

AGENDA ITEM NO. 10:00AM

COUNCIL MEETING: 04/03/14

APPROVED BY

  
DEPARTMENT DIRECTOR

CITY MANAGER

**Date:** April 3, 2014

**FROM:** MIKE SANCHEZ,  Planning Manager  
Development & Resource Management Dept.

**THROUGH:** BONIQUE EMERSON, AICP, Supervising Planner  
Development Services Division

**BY:** NATHAN BOUVET, Planner III  
Development Services Division

**SUBJECT:** Consideration of Rezone Application No. R-14-001 and Environmental Assessment No. R-14-001/V-14-001, filed by Michael Henebury of Bulldog Recycling, pertaining to approximately .79 acres of property located on the east side of North Clark Street between East Floradora and East McKinley Avenues (1454 North Clark Street; APN: 451-151-13) (Property located in District 7)

1. Consider the environmental finding of Environmental Assessment No. R-14-001/V-14-001, a Finding of Conformity, dated January 17, 2014.
2. BILL – Amending the Official Zone Map to reclassify ± .79 acres from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1/CZ (*Light Manufacturing/Conditions of Zoning*) zone district.

## RECOMMENDATION

Staff recommends the City Council take the following action:

1. DENY Rezone Application No. R-14-001, without prejudice.

## EXECUTIVE SUMMARY

Rezone Application No. R-14-001, filed by Michael Henebury, pertains to approximately .79 acres of property located at 1454 North Clark Street, on the east side of North Clark Street between East Floradora and East McKinley Avenues (APN: 451-151-13).

The applicant proposes to amend the Official Zone Map to reclassify the subject property from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1/CZ (*Light Manufacturing/Conditions of Zoning*) zone district. Although the request for M-1/cz zoning is consistent with the light industrial land use designation of 2025 General Plan, and recommended for

approval by the Planning Commission, staff finds that the proposed rezone is not in the best interest of the City. Land use intensity of the M-1 zone district, interface and property development standards, and proposed regulatory changes have prompted staff's position of denial.

## PROJECT INFORMATION

APPLICANT	Michael Henebury
LOCATION	1454 North Clark Street; located on the east side of North Clark Street between East Floradora and East McKinley Avenues. APN: 451-151-13 <b>(Council District 7, Councilmember Olivier)</b>
SITE SIZE	Approximately 0.79 acres
PLANNED LAND USE	Existing - Light Industrial
ZONING	Existing - <u>C-M</u> (Commercial and Light Manufacturing) Proposed - <u>M-1/cz</u> (Light Manufacturing/conditions of zoning)
PLAN DESIGNATION AND CONSISTENCY	Pursuant to Table 2 (Planned Land Use and Zone District Consistency Matrix) of the 2025 Fresno General Plan and Section 12-403-B-1 (Zone District Consistency Table) of the Fresno Municipal Code (FMC), the proposed M-1 zone district classification proposed for the subject property is consistent with the existing Light Industrial planned land use designated for the subject property by the 2025 Fresno General Plan.
ENVIRONMENTAL FINDING	Finding of Conformity filed on January 17, 2014.
PLAN COMMITTEE RECOMMENDATION	There is currently no District 7 Plan Implementation Committee.
STAFF RECOMMENDATION	Recommend denial of Rezone Application No. R-14-001.

## BORDERING PROPERTY INFORMATION

	Planned Land Use	Existing Zoning	Existing Land Use

<b>North</b>	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Warehouse/Office
<b>South</b>	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Consolidated Electrical Distributors
<b>East</b>	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Restoration Services
<b>West</b>	Light Industrial	<b>M-1</b> <i>Light Manufacturing</i>	Building Materials

## BACKGROUND/ANALYSIS

Michael Henebury has filed Rezone Application No. R-14-001 pertaining to approximately 0.79 acres of property located on the east side of North Clark Street between East Floradora and East McKinley Avenues. The rezone request proposes to amend the Official Zone Map to reclassify the property from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1 (*Light Manufacturing*) zone district. Pursuant to Table 2 (Planned Land Use and Zone District Consistency Matrix) of the 2025 Fresno General Plan and Section 12-403-B-1 (Zone District Consistency Table) of the FMC, the proposed M-1 (*Light Manufacturing*) zone district is consistent with the Light Industrial planned land use designated for the subject property.

Although the request for M-1/cz zoning is consistent with the light industrial land use designation of 2025 General Plan, and recommended for approval by the Planning Commission, staff finds that the proposed rezone is not in the best interest of the City. Land use intensity of the M-1 zone district, interface and property development standards, and proposed regulatory changes have prompted staff's position of denial. The exiting residential areas to the south and east of the subject site are currently buffered by C-M zoned property. Typically residential uses are buffered by less intense land use such as office developments. In situations where you have commercial development next to residential, there is a combination solid wall and landscaping requirement. Because of the unique geographic characteristics of the immediate area such as the older lotting pattern; the meandering irrigation canal; and limited street access, proper buffering could not historically be established.

The C-M zone direct acts as the buffer due it prohibitions of the more intense land uses. The proposed M-1 zone district allows such intense uses as animal and poultry slaughtering, blending of water treatment chemicals, adult bookstores, concrete and cement products, and heavy duty machinery shops to name a few which are not permitted in the C-M zone district. The Fresno High-

Roeding Community Plan points out some liabilities of industrial development in the area including lack of adequate off-street parking, visual blight caused by open storage, small lots that are not adequate for large scale development, etc.

On March 6, 2014, The Fresno City Council conducted a workshop on CRV (California Redemption Value) facilities with direction given to update the current city policies which regulate such facilities. These policy updates may include provisions for distances from existing or planned residential uses, notification requirements, distance between CRV facilities; and other pertinent property development standards. The importance of these policy amendments is that it will serve an "interim" guidance policy until such time the City's new development Code is adopted this fall.

Thus, the appropriateness of the proposed project has been examined with respect to its consistency with goals and policies of the 2025 Fresno General Plan and the Fresno High-Roeding Community Plan and for the reasons listed above, staff **cannot** support the rezone request to M-1/cz and recommends the project be denied.

### **Planning Commission**

The Fresno City Planning Commission considered Rezone Application No. R-14-001 and related environmental assessment at its regular meeting held on February 19, 2014. After a full and complete hearing, the Planning Commission resolved, by a vote of 6-0, to recommend approval to the City Council of Rezone Application No. R-14-001 and the related environmental assessment. In its recommendation, the Planning Commission added a condition of zoning that will require the conditional use permit application be reviewed and approved by the Planning Commission.

### *Public Comment*

There was one (1) speaker in support and two (2) speakers in opposition of the proposed project. A variety of concerns in the immediate area were brought up, including, theft, abandoned shopping carts and excessive foot traffic, on-site debris, narrow streets, grade differentiation, traffic and congestion, and noise. In response to concerns brought up during the Planning Commission meeting, the applicant indicated the use of security cameras, site security, on-site maintenance and cleanup, drainage berms, slatted fences, and contract services to pick up abandoned shopping carts being viable options.

### **ENVIRONMENTAL FINDING**

The Development and Resource Management Department staff have prepared an initial study and environmental checklist and evaluated the proposed development in accordance with the land use and environmental policies and provisions of the 2025 Fresno General Plan, the related Master Environmental Impact Report (MEIR) No. 10130 (SCH # 2001071097), and Mitigated Negative Declaration (MND) No. A-09-02 (SCH # 2009051016). The subject property has been proposed to be developed at an intensity and scale that is permitted by the Light Industrial planned land use designated for the subject site. Thus, the proposed project will not facilitate an additional intensification of uses beyond that which already exists or would be allowed by the above-noted

planned land use designation. Moreover, it is not expected that the future development will adversely impact existing city service systems or the traffic circulation system that serves the subject property. These infrastructure findings have been verified by the Public Works and Public Utilities Departments. It has been further determined that all applicable mitigation measures of MEIR No. 10130 and MND No. A-09-02 have been applied to the project necessary to assure that the project will not cause significant adverse cumulative impacts, growth inducing impacts, and irreversible significant effects beyond those identified by MEIR No. 10130 and MND No. A-09-02 as provided by CEQA Section 15177(b)(3).

Therefore, the project proposal has been determined to be within the scope of the MEIR and MND as defined by Section 15177 of the CEQA Guidelines and staff has properly published a Finding of Conformity to MEIR No. 10130 dated January 17, 2014. In addition, after conducting a review of the adequacy of the MEIR pursuant to Public Resources Code Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the MND adopted; and, that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete or the MND was adopted, has become available.

A public notice of the attached Finding of Conformity for Environmental Assessment Application No. R-14-001/V-14-001 was published on January 17, 2014, with no comments or appeals received to date.

#### **LOCAL PREFERENCE**

N/A

#### **FISCAL IMPACT**

Action by the Council will result in timely deliverance of the review and processing of the application as is reasonably expected by the applicant/customer. Prudent financial management is demonstrated by the expeditious completion of this land use application inasmuch as the applicant/customer has paid to the city a fee for the processing of this application and that fee is, in turn, funding the respective operations of the Development and Resource Management Department.

826  
approved - with requirement for  
a conditional use permit

DATE: July 15, 2004 [signature]  
TO: NICK YOVINO, Director of Planning and Development  
THROUGH: RAY VILLA, Code Enforcement Manager [signature]  
FROM: RICHARD SALINAS, Legal Analyst, CUP Strike Team, Code  
Enforcement Division

Re: MODIFICATION OF DIRECTOR'S CLASSIFICATION No. 161 TO  
INCLUDE THE REQUIREMENT OF A CONDITIONAL USE PERMIT;  
TO CLARIFY DISCREPANCIES, AND TO IMPOSE REQUIREMENTS  
CONSISTENT WITH THE SOLID WASTE RECYCLING ORDINANCE  
PERMIT REQUIREMENTS

It has become apparent that there is a need to impose additional, and more specific requirements on recycling facilities such that the public's health and safety are protected and that blight be minimized. This view has evolved from the City's experience with fires which have occurred at recycling facilities in the City of Fresno during the past 2 years and the sudden emergence of recycling facilities throughout the City.

Director's Classification No. 161 was adopted on June 25, 1992. At that time there was no listing for a recycling materials light processing facility in the Zoning Ordinance. When Director's Classification No. 161 was first adopted it incorporated a proposed text amendment that was still in draft form. The draft of the proposed text amendment contained 16 conditions for development of a recycling materials light processing facility within the M1 zoning district. The Director at that time also made several findings, including a finding that a recycling materials light processing facility was similar to the majority of manufacturing and storage uses in the M1 zoning district.

When Director's Classification No. 161 was adopted, it was anticipated that a final version of the proposed text amendment, which became part of Director's Classification No. 161, would be finalized and presented to the Planning Commission for processing and would become the final authority for allowing a recycling materials light processing facility use in the M1 zoning district. The proposed text amendment was never finalized and presented to the Planning Commission, however the need for refining and imposing additional conditions for the development of the recycling facility use in the M1 district remains. Additionally, with the proliferation of such facilities within the City of Fresno, and in light of the City's adoption of the Solid Waste Recycling Facility Ordinance, it has become necessary to modify Director's Classification No. 161 such that recycling materials light facilities are developed in a manner which will not cause substantial injury to the value of property in the neighborhoods or district in which they are likely to be located, and will not pose a threat to health and safety.

On December 16, 2003, the City Council Adopted Article 3 of Chapter 9 of the Fresno Municipal Code which is known as the "Solid Waste and Recycling Facilities Ordinance," ("SWR Ordinance") which requires that recycling materials light processing facilities apply for and obtain a permit authorizing them to operate. The permit is issued on an annual basis. The SWR Ordinance became effective 30 days from the date it was adopted. It has become apparent that there is a need to modify Director's Classification No. 161 to allow for an efficient implementation and enforcement of the SWR Ordinance, as well to clearly define the use and development requirements for the recycling materials light processing facility use.

RECOMMENDATION:

Currently, recycling materials light processing facilities are a "By-Right" use addressed by Director's Classification No. 161. In its current form, Director's Classification No. 161 inadequately defines the parameters for the operation of a recycling materials light processing facility. It also fails to adequately address the variety of recycling materials light processing facilities which are known to exist and which include facilities that recycle paper, non-ferrous metals, plastics and oil. Storage requirements relative to the different types of recycling materials light processing facilities are also inadequately addressed by Director's Classification No. 161. In light of the impending implementation of the SWR Ordinance, along with the other factors mentioned above, it is recommended that Director's Classification No. 161 be modified in accordance with the attached proposed modification. More specifically, it is recommended that the findings contained in the current Director's Classification 161 be retained and that the 16 conditions in the incorporated proposed text amendment be replaced by the modified Director's Classification No. 161 which is attached hereto.

Director's Classification # 161  
(CUP Required)

**Recycling Materials Light Processing Facility**

- A. Processing Facilities under this Director's Classification may process the following recyclable materials: glass, paper, cardboard and aluminum cans/scrap, bi-metal aluminum/tin, and plastic, ferrous and non-ferrous metals (M3 only no shredding). Additional materials may be allowed subject to review and approval of the Development Department Director. Processing Facilities shall be sited only in the M1, M 2 and M3 industrial zones provided they comply with the following conditions, except where more restrictive limitations are required under redevelopment industrial design guidelines and/or state and federal regulations:
- (1) Facility does not abut a property zoned or planned for residential use.
  - (2) Processing facilities are limited to baling, briquetting, crushing, compacting, grinding, shredding and sorting of source-separated recyclable and reusable materials; recycling material accepted at the site shall not contain more than 10 percent of residual debris or 1 percent of putrescible debris.
  - (3) Power-driven processing shall be permitted, provided all noise level requirements are met. All power-driven processing shall be conducted in a wholly enclosed building which shall remain closed during power-driven processing. Outdoor power driven processing may be allowed subject to visual and noise screens, and separation from property lines approved by the Director.

- (4) Processing Facilities with outdoor storage shall provide a perimeter fence or wall, which is opaque, not less than eight feet in height and no higher than 12 feet. Fencing requests over 8 feet in height will be subject to a variance process.
  - (a) Security wire shall be subject to the provisions of Section 12-306-10.
- (5) Indoor storage must conform to all Fire Code requirements.
- (6) Post-processing exterior storage of baled materials is allowed, and must conform to the requirements and limitations under the Fire Code and Zoning Ordinance, and subject to review of a site plan. No exterior storage may exceed the height of the fence surrounding the facility or must be stored within a completely enclosed building.
- (7) All exterior storage of materials, other than baled material, shall be in sturdy containers or enclosures which are covered, secured, and maintained in good condition. Storage containers for flammable material shall be constructed of non-flammable material. All storage containers must be approved by the Director. No storage, excluding truck trailers and overseas containers, will be visible above the height of the fencing. Overseas containers are subject to Director approval and shall be limited to numbers and location.
- (8)
  - (a) A processing facility may accept used motor oil and/or used oil filters for recycling from the generator in accordance with Section 25250.11 of the California Health and Safety Code. All storage of used motor oil and/or used oil filters must be within a containment apparatus capable of containing all stored oil in the event of a spill or leak. No containment apparatus shall exceed a capacity greater

than 55 gallons. All used motor oil and/or used oil filter storage

containers shall be located on an approved surface that is protected from the elements and which must be approved by the Director.

- (b) A processing facility may accept used lead-acid batteries within the meaning of California Health and Safety Code Section 25215.1 ©). All batteries must be stored inside an enclosed building in a manner approved by the Fire Department.

- (9) All exterior storage must be located at least 150 feet from property zoned or planned for residential use. There shall be a 20 foot setback from the property line and/or fence or wall surrounding the facility, and no storage is allowed in this setback area.
- (10) A processing facility shall have a minimum area of one acre and a maximum area based on fire protection, availability of water and adequate vehicular access. A traffic analysis shall be provided for all facilities based on adequate public streets and shall limit shipments of material per day. Based on the proximity of residential uses in the surrounding area, the Development Department Director may require that all processing and storage of material shall be inside an enclosed building.
- (11) Facilities shall provide a minimum of 10 feet of landscaping along any abutting street and shall be subject to the provisions of Section 12-306-N-23 and 24.
- (12) The facility shall be maintained free of litter and any other undesirable materials, and will be cleaned of loose debris on a daily basis and will be secured from unauthorized

entry and removal of materials when attendants are not present.

- (13) Space shall be provided on site for the anticipated peak load of customers to circulate, park and deposit recyclable materials. If the facility is open to the public, space will be provided for a minimum of ten customers or the peak load, whichever is higher, except where the Director determines that allowing overflow traffic is compatible with surrounding businesses and public safety.
- (14) One parking space will be provided for each commercial vehicle operated by the processing center. Parking requirements will otherwise be as mandated by the zone in which the facility is located.
- (15) Noise levels shall not exceed 75 dBA as measured at the property line.
- (16) If the facility is located within 500 feet of property zoned or planned for residential use, it shall not be in operation between 7:00 p.m. and 7:00 a.m. The facility will be administered by on-site personnel during the hours the facility is open.
- (17) Any containers provided for after-hours donation of recyclable materials will be at least fifty feet from any property zoned, occupied or planned for residential use; shall be of sturdy, rustproof construction, shall have sufficient capacity to accommodate materials collected; and shall be secure from unauthorized entry or removal of materials.

- (18) Donation areas shall be kept free of litter and any other undesirable material. The containers shall be clearly marked to identify the type of material that may be deposited. Facility shall display a notice stating that no material shall be left outside the recycling containers.
- (19) Sign requirements shall be those provided for the zoning district in which the facility is located. In addition, facility will be clearly marked with the name and phone number of the facility operator and the hours of operation.
- (20) No dust, fumes, smoke, vibration or odor above ambient level may be detectable on neighboring properties.
- (21) A pass key to the interior and exterior of the facility shall be provided to the Fire Department so as to allow immediate access in the event of a fire or other emergency.
- (22) The Operator shall post signs at each entrance to the exterior and interior of the facility, as well as at the after hours donation containers stating which recyclable materials are accepted at the facility. The Operator shall also post signs at the entrance to the exterior and interior of the facility which list the hazardous materials stored at the facility.
- (23) A copy of the CUP/Site Plan shall be kept at the facility at all times and shall be made available upon request by City, County, State or Federal Officials.

Finding of Conformity

**This page intentionally left blank.**

**CITY OF FRESNO – ENVIRONMENTAL ASSESSMENT**  
**FINDING OF CONFORMITY / MEIR NO. 10130/MND FOR PLAN AMENDMENT A-09-02**  
**(AIR QUALITY MND)**

Pursuant to Section 21157.1 of the California Public Resource Code (California Environmental Quality Act) the project described below is determined to be within the scope of the Master Environmental Impact Report (MEIR) No. 10130 prepared for the 2025 Fresno General Plan

**Applicant:**

Michael Henebury  
Bulldog Recycling  
1631 North Golden State Boulevard  
Fresno, CA 93705

**Initial Study Prepared By:**

Nathan Bouvet, Planner III  
February 14, 2014

**Environmental Assessment Application No.**

R-14-001/V-14-001

**Project Location (including APN):**

1454 North Clark Street; Located on the east side of North Clark Street between East Floradora and East McKinley Avenues, in the City and County of Fresno, California.

36°45'44.7696" N Latitude, - 119°47'7.5402" W Longitude

Mount Diablo Base & Meridian, Township 13 S, Range 20 E, Section 34

(APN: 451-151-13)

**Project Description:** Michael Henebury of Bulldog Recycling has filed Rezone Application No. R-14-001 and Variance Application No. V-14-001 pertaining to approximately 0.79 acres of property located on the east side of North Clark Street between East Floradora and East McKinley Avenues. The rezone request proposes to amend the Official Zone Map to reclassify the property from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1 (*Light Manufacturing*) zone district. The variance requests authorization to allow the facility to be constructed on a piece of property that is slightly less than the one (1) acre minimum lot size required for a recycling facility.

**Conformance to Master Environmental Impact Report (MEIR) NO. 10130:**

The adopted 2025 Fresno General Plan and the Fresno High-Roeding Community Plan designate the subject site for light industrial planned land uses. The requested M-1 zone district conforms to the existing planned land use designation pursuant to Section 12-403-B-1 of the Fresno Municipal Code.

The Development and Resource Management Department staff have prepared an initial study and environmental checklist and evaluated the proposed development in accordance with the land use and environmental policies and provisions of the 2025 Fresno General Plan, the related Master Environmental Impact Report (MEIR) No. 10130 (SCH # 2001071097), and Mitigated Negative Declaration (MND) No. A-09-02 (SCH # 2009051016). The subject property has been proposed to be developed at an intensity and scale that is permitted by the Light Industrial planned land use designated for the subject site. Thus, the proposed project will not facilitate an additional intensification of uses beyond that which already exists or would be allowed by the above-noted planned land use designation. Moreover, it is not expected that the future development will adversely impact existing city service systems or the traffic circulation system that serves the subject property. These infrastructure findings have been verified by the Public Works and Public Utilities

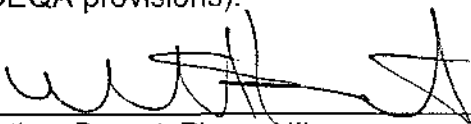

Departments. It has been further determined that all applicable mitigation measures of MEIR No. 10130 and MND No. A-09-02 have been applied to the project necessary to assure that the project will not cause significant adverse cumulative impacts, growth inducing impacts, and irreversible significant effects beyond those identified by MEIR No. 10130 and MND No. A-09-02 as provided by CEQA Section 15177(b)(3).

Pursuant to Section 21157.1 of the California Public Resources Code (California Environmental Quality Act), it may be determined that a subsequent project, as identified in the MEIR pursuant to Section 21157(b)(2) of the Public Resources Code and CEQA Guidelines Section 15177, falls within the scope of a MEIR, provided that the project does not cause additional significant impacts on the environment that were not previously examined by the MEIR and the Air Quality MND.

Relative to this specific project proposal, the environmental impacts noted in the MEIR and the Air Quality MND, pursuant to the 2025 Fresno General Plan land use designation, include impacts associated with the planned land use designation specified for the subject property. Based on this Initial Study, the following findings are made: (1) The proposed project was identified as a Subsequent Project in MEIR No. 10130 because its, location, street designation and permissible densities and intensities are set forth in Figure I-1 of MEIR No. 10130; (2) The proposed project is fully within the scope of the MEIR and Air Quality MND because it will not generate additional significant effects on the environment not previously examined and analyzed by the MEIR or Air Quality MND for the reasons set forth in the Initial Study; and (3) other than identified below, there are no new or additional mitigation measures or alternatives required.

In addition, after conducting a review of the adequacy of the MEIR pursuant to Public Resources Code Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the Air Quality MND was adopted and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete and the Air Quality MND was adopted, has become available. Moreover, as lead agency for this project, the Development and Resource Management Department, per Section 15177(d) of the CEQA Guidelines, has determined that all feasible mitigation measures from MEIR No. 10130 and the Air Quality MND shall be applied to the project as conditions of approval as set forth in the attached Mitigation Monitoring Checklist (See "Master Environmental Impact Report (MEIR) No. 10130/SCH No. 2001071097 For the 2025 General Plan, Mitigation Monitoring Checklist).

Public notice has been provided regarding staff's finding in the manner prescribed by Section 15177(d) of the CEQA Guidelines and by Section 21092 of the California Public Resources Code (CEQA provisions).

36° 45' 44" N Latitude, 119° 47' 7" W Longitude

SEC. 34, T.13S., R.20E., M.D.B & M

**PROJECT DESCRIPTION:** The applicant proposes to amend the Official Zone Map to reclassify the subject property from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1 (*Light Manufacturing*) zone district. If approved, Rezone Application No. R-14-001 will facilitate approval of a Conditional Use Permit which requests authorization to establish a recycling facility on the subject property. A variance application is also required for the proposed project. This variance requests authorization to allow the facility to be constructed on a piece of property that is slightly less than the 1 acre minimum lot size required for a recycling facility.

The City of Fresno has conducted an initial study of the above-described project and it has been determined to be a subsequent project that is fully within the scope of the Master Environmental Impact Report No. 10130 (MEIR) prepared for the 2025 Fresno General Plan (SCH # 2001071097) and Mitigated Negative Declaration prepared for Plan Amendment No. A-09-02 (SCH # 2009051016) (Air Quality MND). Therefore, the Development and Resource Management Department proposes to adopt a Finding of Conformity for this project.

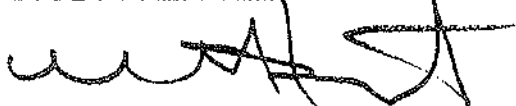

E201410000010

With the mitigation imposed, there is no substantial evidence in the record that this project may have additional significant, direct, indirect or cumulative effects on the environment that are significant and that were not identified and analyzed in the MEIR or Air Quality MND. After conducting a review of the adequacy of the MEIR and Air Quality MND pursuant to Public Resources Code, Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the Air Quality MND was adopted and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete and the Air Quality MND was adopted, has become available. The project is not located on a site which is included on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to, lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subdivision (f) of that Section.

Additional information on the proposed project, including the MEIR, Air Quality MND, proposed environmental finding and the initial study, and a copy of this environmental in electronic format on CD-ROM, may be obtained from the Development and Resource Management Department, Fresno City Hall, 2600 Fresno Street, 3rd Floor Fresno, California 93721-3604. Please contact Nathan Bouvet at (559) 621-8075, or email him at [Nathan.Bouvet@fresno.gov](mailto:Nathan.Bouvet@fresno.gov), for more information.

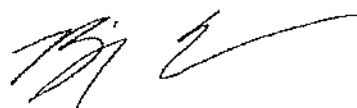

ANY INTERESTED PERSON may comment on the proposed environmental finding. Comments must be in writing and must state (1) the commentor's name and address; (2) the commentor's interest in, or relationship to, the project; (3) the environmental determination being commented upon; and (4) the specific reason(s) why the proposed environmental determination should or should not be made. Any comments may be submitted at any time between the publication date of this notice and close of business on February 18, 2014. Please direct comments to Nathan Bouvet, Planner, City of Fresno Development and Resource Management Department, City Hall, 2600 Fresno Street, Room 3043, Fresno, California, 93721-3604; by email to [Nathan.Bouvet@fresno.gov](mailto:Nathan.Bouvet@fresno.gov); or comments can be sent by facsimile to (559) 498-1026.

SUBSEQUENT PROJECT IDENTIFIED IN MEIR NO. 10130 / MND FOR PLAN  
AMENDMENT A-09-02 (AIR QUALITY MND) / INITIAL STUDY**

**Environmental Checklist Form  
For Environmental Assessment No. R-14-001/V-14-001**

**February 14, 2014**

1.	Project title: Bulldog Recycling- Rezone Application No. R-14-001, Variance Application No. V-14-001
2.	Lead agency name and address:  City of Fresno Development and Resource Management Department 2600 Fresno Street Fresno, CA 93721
3.	Contact person and phone number: Nathan Bouvet, Planner III (559) 621-8075
4.	Project location:  1454 North Clark Street; Located on the east side of North Clark Street between East Floradora and East McKinley Avenues, in the City and County of Fresno, California.  Assessor's Parcel Number: 451-151-13  36°45'44.7696" N Latitude, - 119°47'7.5402" W Longitude
5.	Project sponsor's name and address: Michael Henebury Bulldog Recycling 1631 North Golden State Boulevard Fresno, CA 93705
6.	General Plan Designation: Light Industrial Planned Land Use
7.	Zoning: Existing- C-M (Commercial and Light Manufacturing)  Proposed- M-1 (Light Manufacturing)
8.	Description of project:

	<p>Michael Henebury of Bulldog Recycling has filed Rezone Application No. R-14-001 and Variance Application No. V-14-001 pertaining to approximately 0.79 acres of property located on the east side of North Clark Street between East Floradora and East McKinley Avenues. The rezone request proposes to amend the Official Zone Map to reclassify the property from the C-M (<i>Commercial and Light Manufacturing</i>) zone district to the M-1 (<i>Light Manufacturing</i>) zone district. The variance requests authorization to allow the facility to be constructed on a piece of property that is slightly less than the one (1) acre minimum lot size required for a recycling facility.</p> <p>Pursuant to Table 2 (Planned Land Use and Zone District Consistency Matrix) of the 2025 Fresno General Plan and Section 12-403-B-1 (Zone District Consistency Table) of the FMC the proposed M-1 (<i>Light Manufacturing</i>) zone district is consistent with the Light Industrial planned land use designation for the subject property.</p>																				
9.	<p>Surrounding land uses and setting: (Briefly describe the project's surroundings)</p> <table border="1" data-bbox="249 697 1410 1302"> <thead> <tr> <th></th> <th>Planned Land Use</th> <th>Existing Zoning</th> <th>Existing Land Use</th> </tr> </thead> <tbody> <tr> <td>North</td> <td>Light Industrial</td> <td><b>C-M</b> <i>Commercial and Light Manufacturing</i></td> <td>Warehouse/Office</td> </tr> <tr> <td>South</td> <td>Light Industrial</td> <td><b>C-M</b> <i>Commercial and Light Manufacturing</i></td> <td>Consolidated Electrical Distributors</td> </tr> <tr> <td>East</td> <td>Light Industrial</td> <td><b>C-M</b> <i>Commercial and Light Manufacturing</i></td> <td>Restoration Services</td> </tr> <tr> <td>West</td> <td>Light Industrial</td> <td><b>C-M</b> <i>Commercial and Light Manufacturing</i></td> <td>Building Materials</td> </tr> </tbody> </table>		Planned Land Use	Existing Zoning	Existing Land Use	North	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Warehouse/Office	South	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Consolidated Electrical Distributors	East	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Restoration Services	West	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Building Materials
	Planned Land Use	Existing Zoning	Existing Land Use																		
North	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Warehouse/Office																		
South	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Consolidated Electrical Distributors																		
East	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Restoration Services																		
West	Light Industrial	<b>C-M</b> <i>Commercial and Light Manufacturing</i>	Building Materials																		
10.	<p>Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement): Fresno Metropolitan Flood Control District, City of Fresno Building and Safety Division, County of Fresno Department of Public Health, and the San Joaquin Valley Air Pollution Control District.</p>																				

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

Pursuant to Public Resources Code Section 21157.1(b) and CEQA Guidelines 15177(b)(2), the purpose of this MEIR initial study is to analyze whether the subsequent project was described in the Master Environmental Impact Report No. 10130 and whether the subsequent project may cause any additional significant effect on the environment, which was not previously examined in MEIR No. 10130 ("MEIR") or the Mitigated Negative Declaration prepared for Plan Amendment A-09-02 to amend the Air Quality Element of the 2025 Fresno General Plan (SCH # 2009051016) ("Air Quality MND").

The environmental factors checked below (if any) would be potentially affected by this project,

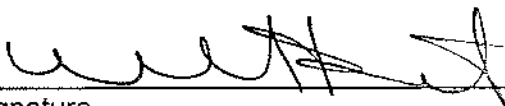

involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

<input type="checkbox"/> Aesthetics	<input type="checkbox"/> Agriculture and Forestry Resources	<input type="checkbox"/> Air Quality
<input type="checkbox"/> Biological Resources	<input type="checkbox"/> Cultural Resources	<input type="checkbox"/> Geology /Soils
<input type="checkbox"/> Greenhouse Gas Emissions	<input type="checkbox"/> Hazards & Hazardous Materials	<input type="checkbox"/> Hydrology/Water Quality
<input type="checkbox"/> Land Use/Planning	<input type="checkbox"/> Mineral Resources	<input type="checkbox"/> Noise
<input type="checkbox"/> Population /Housing	<input type="checkbox"/> Public Services	<input type="checkbox"/> Recreation
<input type="checkbox"/> Transportation/Traffic	<input type="checkbox"/> Utilities/Service Systems	<input type="checkbox"/> Mandatory Findings of Significance

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- ☒ I find that the proposed project is a subsequent project identified in the MEIR and that it is fully within the scope of the MEIR and Air Quality MND because it would have no additional significant effects that were not examined in the MEIR or the Air Quality MND such that no new additional mitigation measures or alternatives may be required. All applicable mitigation measures contained in the Mitigation Monitoring Checklist shall be imposed upon the proposed project. A FINDING OF CONFORMITY will be prepared.
- ☐ I find that the proposed project is a subsequent project identified in the MEIR and Air Quality MND but that it is not fully within the scope of the MEIR and Air Quality MND because the proposed project could have a significant effect on the environment that was not examined in the MEIR or Air Quality MND. However, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project specific mitigation measures and all applicable mitigation measures contained in the MEIR Mitigation Monitoring Checklist will be imposed upon the proposed project. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project is a subsequent project identified in the MEIR but that it MAY have a significant effect on the environment that was not examined in the MEIR or Air Quality MND, and an ENVIRONMENTAL IMPACT REPORT is required to analyze the potentially significant effects not examined in the MEIR or Air Quality MND pursuant to Public Resources Code Section 21157.1(d) and CEQA Guidelines 15178(a).

EVALUATION OF ADDITIONAL ENVIRONMENTAL IMPACTS NOT ASSESSED IN THE MEIR or Air Quality MND:

1. For purposes of this MEIR Initial Study, the following answers have the corresponding meanings:
  - a. "No Impact" means the subsequent project will not cause any additional significant effect related to the threshold under consideration which was not previously examined in the MEIR or Air Quality MND.
  - b. "Less Than Significant Impact" means there is an impact related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND, but that impact is less than significant;
  - c. "Less Than Significant with Mitigation Incorporation" means there is a potentially significant impact related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND, however, with the mitigation incorporated into the project, the impact is less than significant.
  - d. "Potentially Significant Impact" means there is an additional potentially significant effect related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND.
2. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
3. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
4. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
5. A "Finding of Conformity" is a determination based on an initial study that the proposed project is a subsequent project identified in the MEIR and that it is fully within the scope of the MEIR and Air Quality MND because it would have no additional significant effects that were not examined in the MEIR or the Air Quality MND.
6. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
7. Earlier analyses may be used where, pursuant to the tiering, program EIR or MIER, or other CEQA

process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

- a. Earlier Analysis Used. Identify and state where they are available for review.
  - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in the MEIR or another earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
8. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
  9. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
  10. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
  11. The explanation of each issue should identify:
    - a. The significance criteria or threshold, if any, used to evaluate each question; and
    - b. The mitigation measure identified, if any, to reduce the impact to less than significance

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
I. AESTHETICS -- Would the project:				
a) Have a substantial adverse effect on a scenic vista?				X
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X
c) Substantially degrade the existing visual character or quality of the site and its surroundings?				X
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				X

The proposed use is proposed to be located within existing buildings and on a developed site that is in the middle of an area that is planned for light industrial uses. No public or scenic vista will be obstructed by the

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
--	--------------------------------------	---	------------------------------------	--------------

project and no valuable vegetation will be removed for this project. The project will not damage any scenic resources nor will it degrade the visual character or quality of the subject site and its surroundings, given that the building currently exists. The development of the site will not create a new source of substantial light or glare which would affect day or night time views in the project area, given that during the entitlement process, staff will ensure that lights are located in areas that will minimize light sources to the neighboring properties. As a result, the project will have no impact on aesthetics.

II. AGRICULTURE AND FORESTRY RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland,				X

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
to non-agricultural use?				

The subject site is designated as "Urban and Built-Up Land" on the 2006 Rural Mapping Edition: Fresno County Important Farmland Map, and thus has no farmland considered to be prime farmland, farmland of statewide importance, or unique farmland. The subject site is not currently under cultivation. In addition, according to aerial photos that go as far back as 1992, the site has not been under cultivation for a number of years. The land surrounding the site to the north, south, east and west is designated as "Urban and Built-Up Land" by the above mentioned map.

The subject site is not under a Williamson Act contract and is not surrounded by sites under a Williamson Act contract. The subject site and proposed use do not conflict with any forest land or Timberland Production or result in any loss of forest land. The proposed project does not include any changes which will affect the existing environment and result in the conversion of Farmland to non-agricultural uses.

III. AIR QUALITY -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?				X
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				X
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				X
d) Expose sensitive receptors to substantial pollutant concentrations?				X
e) Create objectionable odors affecting a substantial number of people?				X

The proposed project will comply with all applicable air quality plans. Therefore, no violations of air quality standards will occur and no net increase of pollutants will occur. The proposed use, is approved, will be allowed on the subject site and will not expose sensitive receptors to substantial pollutant concentrations. The proposed project is not proposing a use which will create objectionable odors; therefore there will be no impact.

IV. BIOLOGICAL RESOURCES -- Would the project:				
--	--	--	--	--

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				X
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				X
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				X
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

Given that the proposed project will be within an existing building and be located in an area surrounded by urban uses, the proposed project will have no impact on biological resources.

V. CULTURAL RESOURCES -- Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource as defined in '15064.5?				X
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to '15064.5?				X

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				X
d) Disturb any human remains, including those interred outside of formal cemeteries?				X

There are no structures which exist within the project area that are listed in the National or Local Register of Historic Places, and the subject site is not within a designated historic district. There are no known archaeological resources, paleontological resources, and human remains that exist within the project area. The Master Environmental Impact Report (MEIR) No. 10130/SCH No. 2001071097 for the 2025 Fresno General Plan, Mitigation Monitoring Checklist includes measures to address archaeological resources, paleontological resources, and human remains.

VI. GEOLOGY AND SOILS -- Would the project:				
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?				X
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
b) Result in substantial soil erosion or the loss of topsoil?				X
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				X
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				X
e) Have soils incapable of adequately				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				X

There are no geologic hazards or unstable soil conditions known to exist on the site. Fresno has no known active earthquake faults and is not in any Alquist-Priolo Special Studies Zones. No adverse environmental effects related to topography, soils or geology are expected as a result of this project.

VII. HAZARDS AND HAZARDOUS MATERIALS -- Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				X
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?				X
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				X
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				X
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				X
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				X
h) Expose people or structures to a significant				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				X

There are no known existing hazardous material conditions on the site and the project is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. The project itself will not generate or use hazardous materials, is not in an airport hazard zone, is not near any wildland fire hazard zones, and poses no interference with the City's or County's Hazard Mitigation Plans or emergency response plans. The subject site has not been under cultivation for at least over 15 years. Therefore, no known pesticides or hazardous materials exist on the site and the proposed project will have no environmental impacts related to potential hazards or hazardous materials as identified above.

Furthermore, the County of Fresno, has recommended several conditions of approval that will be incorporated into the project: The applicant/operator shall submit, if applicable, an application to operate a recycling center to the California Department of resources Recycling and Recovery (CalRecycle); The operation shall maintain less than 10% residual materials by weight and less than 1% putrescible materials by weight for all incoming loads. If operation exceeds the 10% or 1% threshold for residual materials the applicant will need to file an application with the Fresno County Public Health Department, Environmental Health Division for a Solid Waste Facilities Permit at least one-hundred and eighty (180) days in advance of the date on which it is desired to commence operation.

VIII. HYDROLOGY AND WATER QUALITY -- Would the project:				
a) Violate any water quality standards or waste discharge requirements?				X
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level, which would not support existing land uses or planned uses for which permits have been granted)?				X
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				X
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?				X

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
e) Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff?				X
f) Otherwise substantially degrade water quality?				X
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				X
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				X
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				X
j) Inundation by seiche, tsunami, or mudflow?				X

The proposed project will have no impact on the quality of water and hydrology.

IX. LAND USE AND PLANNING -- Would the project:				
a) Physically divide an established community?				X
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?				X

The proposed project will not divide an established community since the use will be within an existing building in an established community. The project will not conflict with any policies given the fact that the use is allowed in the M-1 zone district. The project will not conflict with any conservation plans since it is not located within any conservation plan areas.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
X. MINERAL RESOURCES -- Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

The subject property is not located in an area designated for mineral resource preservation or recovery.

XI. NOISE -- Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				X
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?				X
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				X
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				X

The project will comply with all noise policies from the 2025 Fresno General Plan and noise codes from the Fresno Municipal Code. The project is not located within the vicinity of an airstrip; therefore there will be no exposure to excessive noise.

XII. POPULATION AND HOUSING -- Would				
--------------------------------------	--	--	--	--

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				X
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				X
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				X

The proposed use will have less employees than the previous use on this site. The project will not induce substantial population growth given that the proposed project is not proposing additional housing. The proposed project will not displace any people or any residential structures given that the project site is used for non-residential uses. Therefore, no population and housing impacts will result from the proposed project.

<b>XIII. PUBLIC SERVICES</b>				
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?				X
Police protection?			X	
Schools?				X
Parks?				X
Other public facilities?				X

The proposed project will not impact public services beyond what was analyzed in the Master Environmental Impact Report No. 10130. The subject site will continue to be utilized for light industrial uses as the site was designated by the 2025 Fresno General Plan.

<b>XIV. RECREATION --</b>				
a) Would the project increase the use of				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

The project does not include or require construction of recreational facilities that might have an adverse physical effect on the environment, therefore no recreation impacts are generated by the project.

XV. TRANSPORTATION/TRAFFIC -- Would the project:				
a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?				X
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?				X
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				X
e) Result in inadequate emergency access?				X
f) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				X

The proposed project is not expected to generate traffic which would significantly impact any nearby roads. There would also not be an increase in traffic beyond what is allowed. Therefore, the project would have no impact and not cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system, or in a substantial increase in vehicle miles traveled.

XVI. UTILITIES AND SERVICE SYSTEMS--				
--------------------------------------	--	--	--	--

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
Would the project:				
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				X
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				X
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the projects projected demand in addition to the provider's existing commitments?				X
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				X
g) Comply with federal, state, and local statutes and regulations related to solid waste?				X

The project site will be continue to be serviced by the Solid Waste Division, have water facilities available to provide water service to the site subject to several conditions, and sewer facilities will be available to provide service to the subject site.

The proposed project is not expected to exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board and will not result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, or result in the construction of new storm water drainage facilities or expansion of existing facilities. Therefore, there will be no impacts to utilities and service systems.

<b>XVII. MANDATORY FINDINGS OF SIGNIFICANCE --</b>				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporation	Less Than Significant Impact	No Impact
population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				X
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)				X
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				X

As noted in preceding sections of this Initial Study, there is no evidence in the record to indicate that the increment of environmental impacts that would be potentiated by this project would be cumulatively significant. There is also no evidence in the record that the proposed project would have any adverse impacts directly, or indirectly, on human beings. Therefore, there are no mandatory findings of significance.

**Mitigation Monitoring Checklist**

Following is the mitigation monitoring checklist from MEIR No. 10130 as applied to the above-noted project's environmental assessment, required by City Council Resolution No. 2002-378 and Exhibit E thereof (adopted on November 19, 2002) to certify the MEIR for the 2025 Fresno General Plan Update. On June 25, 2009, through its Resolution No. 2009-146, the City Council adopted Environmental Assessment No. A-09-02 confirming the finding of a Mitigated Negative Declaration prepared for General Plan Amendment Application No. A-09-02 which updated the Air Quality Section of the Resource Conservation Element of the 2025 Fresno General Plan and incorporated additional and revised mitigation measures as necessary within the following monitoring checklist.

A - Incorporated into Project  
B - Mitigated  
C - Mitigation in Progress  
D - Responsible Agency Contacted  
E - Part of City-wide Program  
F - Not Applicable

**NOTE:** Letters B-Q in mitigation measures refer to the respective sections of Chapter V of MEIR No. 10130

could affect conditions on major street segments predicted by the General Plan MEIR traffic analysis to perform at an ADT LOS F shall not cause further substantial degradation of conditions on those segments before 2025 without completing a traffic and transportation evaluation. This evaluation will be used to determine appropriate project-specific design measures or street/transportation improvements that will contribute to achieving and maintaining a LOS equivalent to that anticipated by the General Plan. Further substantial degradation is defined as an increase in the peak hour vehicle/capacity (v/c) ratio of 0.15 or greater for roadway segments whose v/c ratio is estimated to be 1.00 or higher in 2025 by the General Plan MEIR traffic analysis.	of land use entitlement	Dept./Traffic Planning; Development & Resource Management Dept.						
<b>B-4.</b> For development projects that are consistent with plans and policies, a site access evaluation shall be required to the satisfaction of the Public Works Director. This evaluation shall, at a minimum, focus on the following factors: a. Disruption of vehicular traffic flow along adjacent major streets, appropriate design measures for on-site vehicular circulation and access to major streets (number, location and design of driveway approaches), and linkages to bicycle/pedestrian circulation systems and transit services. b. In addition, for development projects that the City determines may generate a projected 100 or more peak hour vehicle trips (either in the morning or evening), the evaluation shall determine the project's contribution to increased peak hour vehicle delay at major street intersections adjacent or proximate to the project site. The evaluation shall identify project responsibilities for intersection improvements to reduce vehicle delay consistent with the LOS anticipated by the 2025 Fresno General Plan. For projects which affect State Highways, the Public Works Director may direct the site access evaluation to reference the criteria presented in Caltrans Guide for the Preparation of Traffic Impact Studies. MEIR Review Summary

**This page intentionally left blank.**

## **MASTER ENVIRONMENTAL IMPACT REPORT (MEIR) REVIEW SUMMARY**

**Projected Population and Housing.** The City of Fresno experienced a period of notable growth in the construction of single family residences over the first five-year period of the 2025 Fresno General Plan (2003 through 2007). However, this development has occurred within the parameters anticipated by the General Plan and the mitigation measures established by Master Environmental Impact Report (MEIR 10130/SCH 2001071097). The General Plan and its MEIR utilized a projected population growth rate for purposes of land use and resource planning. This projection anticipated an annual average population growth of approximately 1.9 percent over the 23-year planning period. Population estimates provided by the State of California Department of Finance (DOF) indicate a population growth of approximately 60, 000 people between 2002 and 2007 with a growth rate varying from 1.47 to 1.97 percent per year. These estimates are well within the growth projections of the General Plan and MEIR.

The City has processed 110 plan amendment applications since the adoption of the 2025 Fresno General Plan. These applications have resulted in changes of planned land use that affected approximately 1,000 acres, representing approximately one percent of the land area within the 2025 Fresno General Plan boundary. The impacts of these amendments are minimal and not significant in relation to the balance of the density and intensity of the land uses impacted by the plan amendment applications.

Based upon this, many of the assumptions relied upon for the MEIR to address other impacts, such as traffic, air quality, need for public utilities, services and facilities and water supplies are still valid to the extent that these assumptions relied upon projected population growth during the General Plan planning period. For this reason and the others provided below, the Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known pursuant to CEQA Guideline Section 15179(b)(1) and the MEIR may still be relied upon.

**Transportation and Circulation.** Subsequent to the certification of the MEIR the City of Fresno has required the preparation of approximately 200 site specific traffic impact studies and had required the provision of street, intersection signalization and transportation improvements in accordance with the adopted mitigation measures of the MEIR. The City's Traffic Engineer reports that through review of these approximately 200 traffic impact studies, the City has not seen traffic counts substantially different than those predicted by the MEIR. Concurrently with these efforts, the City adopted a new program for traffic signal and major street impact fees to pay for planned improvements throughout Fresno (not just in new growth areas, as has been the case with the previous impact fee program). These fees will more comprehensively provide for meeting transportation infrastructure needs and will expedite reimbursement for developments, which construct improvements that exceed the project's proportionate share of the corresponding traffic or transportation capacity needs.

In addition to the local street system, the City has entered into an agreement with the California Department of Transportation to collect impact fees for state highway facilities which may be impacted by new development projects. The City participates in the Fresno County Transportation Authority, which recently was successful in obtaining voter re-authorization of a

half-cent sales tax to be dedicated to a wide range of transportation facilities and programs (including mass transit). The City is also an active participant in ongoing regional transportation planning efforts, such as a freeway deficiency study, a corridor study for one or more additional San Joaquin River crossings, and the State's "Blueprint for the Valley" process. All these studies were commenced after the MEIR was certified, but none of them is yet completed. Therefore, it cannot be concluded that Fresno's environmental setting or the MEIR analysis of traffic and circulation have materially changed since November of 2002.

Therefore, Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon traffic impacts pursuant to CEQA Guideline Section 15179(b)(1).

**Air Quality and Global Climate Change** Staff has worked closely with the regional San Joaquin Valley Air Pollution Control District (SJVAPCD) since the November 2002 certification of the 2025 Fresno General Plan Master Environmental Impact Report (MEIR). Potential air quality impacts have been analyzed for every environmental assessment initial study done for City development projects. Projects are required to comply with SJVAPCD rules and regulations via conditions of approval and mitigation measures formulated in the MEIR.

Overall, revisitation of these issues leads to the conclusion that, while there have been changes in air quality laws, planning requirements, and rules and regulations since certification of the MEIR, the actual environmental setting has not evidenced degradation of air quality. (Because air quality and global climate change are matters of some public controversy, additional documentation has been supplied on this issue; please refer to the appended full analysis with supporting data.)

In conjunction with SJVAPCD attainment plans and attendant rules and regulations that were adopted prior to the certification of the MEIR, policies in the 2025 Fresno General Plan and MEIR mitigation measures aimed at improving air quality appear to be working. Since 2002, data show that pollutant levels have been steadily decreasing for ozone/oxidants and for particulate matter (10 microns and 2 microns in size). Recent adoption of new air quality attainment plans by SJVAPCD, calling for broader and more stringent rules and regulations to achieve compliance with national and state standards, is expected to accelerate progress toward attainment of clean air act standards.

Analysis of global climate change analysis was not part of the MEIR in 2002, due to lack of scientific consensus on the matter and a lack of analytical tools. However, under the MEIR and General Plan mitigation measures and policies for reducing all forms of air pollution, levels of greenhouse gases have been reduced along with the other regulated air pollutants. At this point in time, detailed analysis and conclusions as to the significance of greenhouse gas emissions and strategies for mitigation are still not feasible, because the legislatively-mandated greenhouse gas inventory benchmarking and the environmental analysis policy formulation tasks of the California Environmental Protection Agency Air Resources Board and the Governor's Office of Planning and research are not completed. The information available does not support any conclusion that Rezone Application No. R-14-001 and Variance Application No. V-14-001 or other City projects would have a significantly adverse impact on global climate change. Similarly, there is insufficient information to conclude that global climate change would have a significantly adverse impact upon the City of Fresno or specific development projects.

Staff is not aware of any particular circumstance or information that would make impacts to air quality a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Therefore, Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon air quality impacts pursuant to CEQA Guideline Section 15179(b)(1).

**Water Supply, Quality and Hydrology.** The City of Fresno has initiated, continued and completed numerous projects addressing general plan and MEIR provisions relating maintaining an adequate supply of safe drinking water to serve present and future projected needs. A water meter retrofit program to meter service to all consumers by the end of the year 2012 is underway, in compliance with State law that predated the MEIR and with new regulations affecting the U.S. Bureau of Reclamation Central Valley Project. (While the federal regulation has trumped a voter-approved City charter amendment that specifically prohibited using meters for residential development, the City's plans and policies have always contained measures calling for water conservation and for seeking ways to reduce average consumption of households. Metering is recognized as the best implementation measure for this, and does not constitute a change in the City's environmental setting or the analysis and mitigation in the 2025 Fresno General Plan MEIR.) After certification of the MEIR, the City commenced operation of its northeast area surface water treatment facility; initiated and began construction of additional groundwater wells with granular activated carbon filtration systems as necessary to remediate groundwater contamination that was discussed in the MEIR and its mitigation measures; provided for additional groundwater recharge areas; and expanded its network of water transmission main pipeline improvements allowing for improved distribution of water supply.

As called for in 2025 General Plan policies and MEIR mitigation measures, the City has implemented several programs for preventing water pollution: In conjunction with Fresno Metropolitan Flood Control District and the Regional Water Quality Control Board (RWQCB) City inspectors assist in enforcing the National Pollutant Discharge Elimination System Stormwater Pollution Prevention regulations, The Planning and Development Department also consults with RWQCB on specific development projects which may require on-site wastewater treatment, and provides project-specific conditions and even supplemental environmental analysis for such projects, with specific mitigation measures. The City's Department of Public Utilities has enhanced its industrial pretreatment permitting program for industrial wastewater generators who discharge to the Fresno-Clovis Wastewater Treatment and Reclamation Facility.

Staff is not aware of any particular circumstance or information that would make impacts to water supply, quality and hydrology a reasonably foreseeable impact or more severe impact from that identified in the MEIR. The Director of Public Utilities finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon traffic impacts pursuant to CEQA Guideline Section 15179(b)(1).

**Agricultural Resources.** The implementation of applicable policies since adoption of the 2025 Fresno General Plan has encouraged the development of urban uses in a more systematic pattern that avoids discontinuity and the creation of vacant by-passed properties. These efforts, together with the requirement to record "right-to-farm" covenants, facilitate the continuation of existing agricultural uses within the city's planned urban growth boundary during the interim period preceding orderly development of the property as anticipated by the General Plan. Staff is not aware of any particular circumstance or information that would make impacts from loss of agricultural resources a reasonably foreseeable impact or more severe impact from that

identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of agricultural resources pursuant to CEQA Guideline Section 15179(b)(1).

**Demand for Utilities and Service Systems.** The City of Fresno has continued to provide for utilities and service systems commensurate with the demands of increased population and employment within its service area, implementing policies of the 2025 Fresno General Plan and conforming to MEIR mitigation measures. Programmatic measures have been continued, expanded or initiated to increase the efficiencies of providing services in a manner that will reduce potential impacts upon the natural and human environment. These improvements have included bringing the City's first surface water treatment plant on-line to distribute treated surface water, thereby preventing a worsening of groundwater overdraft in northeast Fresno; converting a substantial portion of the City's service vehicle fleet to alternative fuels; and expanding recycling and conservation measures (including contracting with a major material sorting and recycling facility and a green waste processor to comply with AB 939 solid waste reduction mandates) to more judiciously use resources and minimize adverse impacts the environment. Adoption of City-wide police and fire facility development impact fees and a contract to consolidate fire service with an adjacent fire prevention district have been accomplished to assure the provision of adequate firefighting capacity to serve a broader geographic extend of urban development and more intensive and mixed-use development throughout the metropolitan area.

Because these changes were anticipated in, or provided for by, the 2025 Fresno General Plan and its MEIR mitigation measures, they do not constitute a significant or adverse alteration of Fresno's environmental setting. Staff is not aware of any particular circumstance or information that would make impacts from increased demand for utilities and service systems and public facilities a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to increased demand for utilities, service systems, and public facilities pursuant to CEQA Guideline Section 15179(b)(1).

**Demand for Recreational Facilities.** The City of Fresno has adopted and City-wide parks facility and Quimby Act fee which provides for the acquisition of new open space and recreation facilities as well as improvements to existing facilities and programs to provide a broader range of recreation opportunities. Staff is not aware of any particular circumstance or information that would make impacts from increased demand for recreational facilities a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to increased demand for utilities, service systems, and public facilities pursuant to CEQA Guideline Section 15179(b)(1).

**Biological Resources.** The City continues to evaluate all development proposals for potential impacts upon natural habitats and associated species dependent upon these habitats. The City supports continuing efforts to acquire the most prominent habitats where appropriate, such as portions of the San Joaquin River environs. When development or public works projects have been proposed in this area, they have been subject to site-specific evaluation through supplemental environmental analyses, and appropriate mitigation measures and conditions

applied as derived from consultation with the U.S. Fish and Wildlife Service and the California Department of Fish and Game. The City has imposed MEIR mitigation measures related to Biological Resources on projects that identified potential impacts to biological resources. Staff finds that this has adequately addressed any potential impact to biological resources. Staff is not aware of any particular circumstance or information that would make impacts from loss of biological resources a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of biological resources pursuant to CEQA Guideline Section 15179(b)(1).

**Potential Disturbance of Cultural Resources.** The City of Fresno has implemented numerous efforts to identify historic and cultural resources, and provide thorough consideration as to their value and contributions to understanding or historic and cultural heritage.

Additionally, staff follows the MEIR mitigation measures for potential cultural resources. Staff is not aware of any particular circumstance or information that would make impacts to cultural resources a reasonably foreseeable impact that was not identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of cultural resources pursuant to CEQA Guideline Section 15179(b)(1).

Within the last five years, the City has lost two lawsuits (Valley Advocates v. COF and Heritage Fresno v. RDA, City of Fresno) related to historical resources that related to six particular buildings at two different particular sites. The CEQA projects at issue were reviewed under independent CEQA documents, not under the MEIR as subsequent projects (*i.e.*, one under a separate EIR and one under a categorical exemption). These projects are site specific and are not reasonably expected to create additional impacts to cultural resources that would affect a finding under Section 15179. These particular projects may be properly assessed under the MEIR focused EIR procedures or mitigated negative declaration procedures under Section 15178 and not affect the overall MEIR findings.

**Generation of Noise.** The City of Fresno continues to implement mitigation measures and applicable plan policies to reduce the level of noise to which sensitive noise receptors are exposed. These efforts include identification of high noise exposure areas, limiting the development of new noise sensitive uses within these identified areas and conducting noise exposure studies and requiring implementation of appropriate design measures to reduce noise exposure. Staff finds that these efforts have adequately addressed any potential impacts that may have arisen related to noise and is not aware of any facts or circumstance that would make noise impacts have a more severe impact than that identified in the MEIR. Additionally, staff is not aware of any information or data that was not known at the time that the MEIR was certified that would be able to mitigate noise impacts beyond that identified and contemplated by the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to noise impacts pursuant to CEQA Guideline Section 15179(b)(1).

**Geology and Soils.** The City of Fresno has a predominantly flat terrain with few geologic or soil quality constraints. The City continues to apply applicable local and state construction codes

and standards and continues to adopt new standards as appropriate to insure the safety of residents and protection of property improvements.

Staff finds that these codes and standards have adequately addressed any potential impacts that may have arisen related to geology and soils and is not aware of any facts or circumstance that would make impacts related to geology and soils a reasonably foreseeable impact not addressed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known regarding impacts related to geology and soils pursuant to CEQA Guideline Section 15179(b)(1).

**Hazards and Potential Generation of Hazardous Materials** The City continues to implement General Plan policies and assure compliance with MEIR mitigation measures as new development is planned and constructed, and as Code Enforcement activities are conducted, in order to prevent flood damage, structural failures due to soil and geologic instability, and wildfire losses. Development in the vicinity of airports has been reviewed and appropriately conditioned with regard to adopted and updated airport safety and noise policies. In consultation with Fresno County Environmental Health and the California Environmental Protection Agency Department of Toxic Substances Control, industrial and commercial facilities that use, handle, or store potentially hazardous materials are appropriately sited, conditioned, and inspected periodically by the Fresno Fire Department to prevent adverse occurrences. Homeland Security regulations have been taken into consideration when reviewing food production, processing and storage facilities, and the City has conducted and participated in multiple emergency response exercises to develop response plans that would protect life, health, and safety in the event of railroad accidents and other potential hazards.

Staff finds that these procedures, as outlined in the 2025 Fresno General Plan and its MEIR (as well as in related regulations and codes pertaining to hazards and hazardous materials) have adequately addressed potential impacts that may have arisen related to hazards. Staff is not aware of any facts or circumstance that would make impacts related to hazards and hazardous materials reasonably foreseeable impacts not addressed in the MEIR. Staff finds that the circumstances have not materially changed from the time the MEIR was certified and/or new information is not known related to impacts from hazards and hazardous materials pursuant to CEQA Guideline Section 15179(b)(1).

**Demand for Energy.** The City of Fresno has taken a number of steps to reduce energy consumption, both "in house" to set an example, and in the policy arena. The most notable "in-house" actions are the following:

- Construction of solar panel generator facilities at the Municipal Services Center (MSC) and at Fresno-Yosemite International Airport. The MSC facility, completed in 2004, generates 3.05 GWh of energy (equivalent to operation of 286 homes per year) and has resulted in reduction of 966 tons of CO<sub>2</sub> emissions (equivalent to 2,414,877 vehicular miles not driven).
- Replacement of a significant number of vehicles in the municipal fleet with clean air vehicles (please refer to the following table).

**CURRENT CITY OF FRESNO "CLEAN AIR" FLEET**

50	CNG Transit Buses
4	CNG Trolleys
6	CNG Handi-Ride Buses
59	Retrofitted Diesel Powered Buses with REV (reduced emission vehicle) engines and diesel particulate traps
2	Hybrid (gasoline-electric) Transit Buses
2	Hybrid (diesel-electric) Transit Buses
12	Compressed Natural Gas (CNG) Pickups, Vans and Sedans
7	Flex Fuel Pickups, Vans and Sedans (CNG/Unleaded Fuel)
3	Compressed Natural Gas (CNG) Street Sweepers
52	Hybrid (gasoline-electric) Sedans and Trucks
34	Electric Vehicles
5	Propane Powered Vehicles
103	LNG Powered Refuse Trucks
59	Retrofitted Diesel Powered Refuse Trucks with combination lean NOx catalyst and diesel particulate filters
9	Retrofitted Diesel Powered Street Sweepers with combination lean NOx catalyst and diesel particulate filters
1	Plug-In CNG/Electric Hybrid Refuse Truck
56	Heavy duty diesel trucks and construction equipment equipped with exhaust after-treatment devices
9	Off Road Equipment with exhaust after-treatment devices
<b>473</b>	<b>Total "Clean Air" Vehicles in the City of Fresno fleet</b>

In the development standards policy arena, the City is taking numerous steps to increase residential densities and connectivity between residential and commercial land uses, thus facilitating more walking, biking and transit ridership (which has increased 22% in recent months) and saving energy:

- Amended the zoning code to allow development of mixed use projects in all commercial zone districts citywide, and in the C-M and M-1 zone districts within the Central Area.
- Amended the zoning code to allow density bonuses for affordable housing projects. Such bonuses permit density increases of approximately 30%.
- Amended zoning code to eliminate the “drop down” provision, which permitted development at one density range less than that shown on the adopted land use map.
- Amended the zoning code to increase heights in various residential and commercial zone districts and reduce the minimum lot size in the R-1 zone district from 6,000 to 5,000 square feet.
- Initiated the Activity Center Study, which is defining the potential Activity Centers located in Exhibit 6 of the 2025 Fresno General Plan and proposing design classifications and increased density ranges for these centers and corresponding transportation corridors.

Staff is not aware of any facts or circumstance that would make impacts related to energy demands reasonably foreseeable impacts that were not addressed in the MEIR. Staff finds that the circumstances have not materially changed from the time the MEIR was certified and/or new information is not known related to energy demand impacts pursuant to CEQA Guideline Section 15179(b)(1).

**Mineral Resources.** The City of Fresno has adopted plan policies and City ordinance provisions consistent with requirements of the State of California necessary to preserve access to areas of identified resources and for restoration of land after resource recovery (surface mining) activities. Staff finds that these policies and Fresno Municipal Code provisions have adequately addressed any potential impacts that may have arisen related to mineral resources and is not aware of any facts or circumstance that would make loss of mineral resources a reasonably foreseeable impact not addressed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of mineral resources pursuant to CEQA Guideline Section 15179(b)(1).

**School Facilities.** The City of Fresno continues to consult with affected school districts and participate in school site planning efforts to assure the identification of appropriate location alternatives for planned school facilities. Staff is not aware of any information from the school districts or otherwise to demonstrate that adequate school facilities are not being accommodated under the current General Plan and/or that the need for school facilities is expected to cause impacts not identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to need for school facilities pursuant to CEQA Guideline Section 15179(b)(1).

**Potential Aesthetic Impacts.** Design Guidelines were appended to the 2025 Fresno General Plan through the plan adoption process conducted concurrently with MEIR analysis. As noted previously, General Plan policies encourage and promote infill development, and the City of Fresno Planning and Development Department has implemented design guidelines for reviewing infill housing development proposals. The Department has prepared detailed design guidelines for the Tower District Specific Plan area and the Fulton-Lowell Specific Plan area, both of which contain enclaves of unique structures. The City has adopted policies promoting incorporation of public art within private development projects, which will contribute to a more appealing visual environment, benefitting users of the private property as well as the surrounding community. In addition, the City of Fresno and the City of Fresno Redevelopment Agency have funded public improvements which improve the general aesthetic. Staff is not aware of any situation or circumstances where there are reasonably foreseeable aesthetic impacts not identified and assessed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related aesthetic impacts pursuant to CEQA Guideline Section 15179(b)(1).

Appendix: Status of MEIR Analysis With Regard to Air Quality and Climate Change

## **APPENDIX**

### **STATUS OF MEIR ANALYSIS WITH REGARD TO AIR QUALITY AND CLIMATE CHANGE**

#### **EXECUTIVE SUMMARY**

Planning staff has worked closely with the regional San Joaquin Valley Air Pollution Control District (SJVAPCD) since the November 2002 certification of the 2025 Fresno General Plan Master Environmental Impact Report (MEIR). Potential air quality impacts have been analyzed for every environmental assessment initial study done for City development projects. Projects are required to comply with SJVAPCD rules and regulations via conditions of approval and mitigation measures formulated in the MEIR.

Overall, revisitation of these issues leads to the conclusion that, while there have been changes in air quality laws, planning requirements, and rules and regulations since certification of the MEIR, the actual environmental setting has not evidenced degradation of air quality. In conjunction with SJVAPCD attainment plans and attendant rules and regulations that were adopted prior to the certification of the MEIR, policies in the 2025 Fresno General Plan and MEIR mitigation measures aimed at improving air quality appear to be working. Since 2002, data show that pollutant levels have been steadily decreasing for ozone/oxidants and for particulate matter (10 microns and 2 microns in size). Recent adoption of new air quality attainment plans by SJVAPCD, calling for broader and more stringent rules and regulations to achieve compliance with national and state standards, is expected to accelerate progress toward attainment of clean air act standards.

Analysis of global climate change analysis was not part of the MEIR in 2002, due to lack of scientific consensus on the matter and a lack of analytical tools. However, under the MEIR and General Plan mitigation measures and policies for reducing all forms of air pollution, levels of greenhouse gases have been reduced along with the other regulated air pollutants. At this point in time, detailed analysis and conclusions as to the significance of greenhouse gas emissions and strategies for mitigation are still not feasible, because the legislatively-mandated greenhouse gas inventory benchmarking and the environmental analysis policy formulation tasks of the California Environmental Protection Agency Air Resources Board and the Governor's Office of Planning and research are not completed. The information available does not support any conclusion that Rezone Application No. R-14-001 and Variance Application No. V-14-001 or other City projects would have a significantly adverse impact on global climate change. Similarly, there is insufficient information to conclude that global climate change would have a significantly adverse impact upon the City of Fresno or specific development projects.

**SUPPORTING DATA AND ANALYSIS**

While there have been changes in air quality regulations since the November 2002 certification of the 2025 Fresno General Plan MEIR, the actual environmental setting has not evidenced degradation of air quality.

The adverse air quality impacts associated with the myriad of human activities potentiated by the long range general plan for the Fresno metropolitan area can be expected to remain significant and unavoidable, and cannot be completely mitigated through the General Plan or through project-level mitigation measures. In order to provide a suitable living environment within the metropolitan area, the General Plan and its MEIR included numerous air pollution reduction measures.

The 2025 Fresno General Plan and its MEIR gave emphasis to pursuing cleaner air as an overarching goal. The urban form element of the General Plan was designed to foster efficient transportation and to support mass transit and subdivision design standards are being implemented to support pedestrian travel. Strong policy direction in the Public Facilities and Resource Conservation elements require that air pollution improvement be a primary consideration for all land development proposals, that development and public facility projects conform to the 2025 Fresno General Plan and its EIR mitigation measures, and that the City work conjunctively with other agencies toward the goal of improving air quality.

The MEIR mitigation checklist sketched out a series of actions for the City to pursue with regard to its own operations, and City departments are pursuing these objectives. The Fresno Area Express (FAX) bus fleet and the Department of Public Utilities solid waste collection truck fleet are being converted to cleaner fuels. Lighter-duty vehicle fleets are also incorporating alternative fuels and "hybrid" vehicles. Mass transit system improvements are supporting increased ridership. Construction of sidewalks, paseos, bicycle lanes and bike paths is being required for new development projects, and are being incorporated into already-built segments of City rights-of-way with financing from grants, gas tax, and other road construction revenues. Traffic signal synchronization is being implemented. The Planning and Development Department amended the Fresno Municipal Code to ban all types of residential woodburning appliances, thereby removing the most prominent source of particulate matter pollution from new construction.

Pursuant to a specific MEIR mitigation measure, all proposed development projects are evaluated with the "Urbemis" air quality impact model that evaluates potential generation of a range of air pollutants and pollutant precursors from project construction, project-related traffic, and from various area-wide non-point air pollution sources (e.g., combustion appliances, yard maintenance activities, etc.). The results of this "Urbemis" model evaluation are used to determine the significance of development projects' air quality impacts as well as the basis for any project-specific air quality mitigation measures.

There are no new (*i.e.*, unforeseen in the MEIR) reasonable mitigation measures which have become available since late 2002 that would assure the reduction of cumulative (city-wide) air quality impacts to a less than significant level at project buildout, even with full compliance with attainment plans and rules promulgated by the California Air Resources Board and the San Joaquin Valley Air Pollution Control District.

Through implementation of regional air quality attainment plans by the San Joaquin Valley Unified Air Pollution Control District (SJVAPCD), as supported by implementation of 2025 Fresno General Plan policies and MEIR mitigation measures, air pollution indices have shown improvement. Progress is being made toward attainment of federal and state ambient air quality standards.

Ozone/oxidant levels have shown gradual improvement, as depicted in the following graphs and charts from the California Air Resources Board (graphics with an aqua background) and from the San Joaquin Valley Air Pollution Control District (those with no background color):

GRAPH NOTES: The "National 1997 8-Hour Ozone Design Value" is a three-year running average of the fourth-highest 8-hour ozone measurement averages in each of the three years (computed according to the method specified in Title 40, Code of Federal Regulations, Part 50, Appendix I).

Under the 1997 standard, in effect through the end of 2007, "Attainment" would be achieved if the three-year average were less than, or equal to, 84 parts per billion (ppb), or 0.084 parts per million (ppm). In 2008, a new National 8-Hour Ozone Attainment standard went into effect: a three year average of 75 ppb (0.075 ppm). Data and attainment status for 2008 is expected to become available in 2009.

The California Clean Air Act has a different calculation method for its 8-hr oxidant [ozone] standard design value, and an attainment standard that is lower (0.070 ppm). The ozone improvement trend under the state Clean Air Act 8-hour ozone standard parallels the trend for the national 8-hour standard.

Correspondingly, the number of days per year in which the National 8-hour Ozone Standard has been exceeded have also decreased since the end of 2002:

**Ozone Trends Summary: San Joaquin Valley Air Basin**

In 1997, the Federal Clean Air Act repealed the former National 1-hour Ozone standard. However, the California Clean Air Act retains this air pollution parameter. The days per year in which the State of California 1-hour ozone standard has been exceeded have also shown a generally decreasing trend in the time since the 2025 Fresno General Plan MEIR was certified:

The current ozone attainment plan for the San Joaquin Valley Air Basin, in place when the MEIR for the 2025 Fresno General Plan was certified, is linked to a federal designation of "Serious Nonattainment." While ozone/oxidant air quality conditions are showing a trend toward improvement, the rate of progress toward full attainment is not sufficient to reach the national ambient air quality standards by the target date established by the attainment plan. Mobile sources (vehicle engines) are the primary source for ozone precursors, and the regulation of mobile sources occurs at the national and state levels and is beyond the direct regulatory reach of the regional air pollution control agency. As noted in the 2025 Fresno General Plan MEIR and reflected in the Statement of Overriding Considerations made when the MEIR was certified, potentially significant and unavoidable adverse air quality impacts are inherent in population growth and construction in the City of Fresno, given the Valley's climatology and the limitations on regulatory control of air pollutant precursors.

In 2004, the San Joaquin Valley Air Pollution Control District, in conjunction with the California Air Resources Board, approved a re-designation for the San Joaquin Valley Air Basin to "Extreme Nonattainment" status for ozone, approving a successor air quality attainment plan that projects San Joaquin Valley attainment of the national 8-hour ozone standard by year 2023. This designation and its accompanying attainment plan were submitted to the U.S. Environmental Protection Agency (USEPA) in November of 2004. To date, no formal action has been taken by USEPA to date on the proposed designation or the attainment plan; the Valley remains in "Severe Non-attainment" as of this writing.

The change from "Severe" to "Extreme" ozone Nonattainment would represent an extension of the deadline for attainment, but since the regional air basin would not have achieved attainment by the original deadline, this does not materially affect environmental conditions for the City of Fresno as they were analyzed in the MEIR for the 2025 Fresno General Plan. The proposed revised ozone attainment plan includes not only all the measures in the preceding ozone attainment plan, but additional measures for regulating a wider range of activities to attain ambient air quality standards.

The Valley's progress toward attaining national and state standards for PM-10 (particulate matter less than 10 microns in diameter) has been greater since certification of the MEIR:

As the preceding chart reveals, levels of PM-10 air pollution have decreased since 2002. When the MEIR was certified, the San Joaquin Valley Air Basin was designated in "Serious Nonattainment" for national standards. As of 2007, the number of days where standards were exceeded has decreased to the extent that the Valley has been deemed to be in Attainment. Under Federal Clean Air Act Section 107(d)(3), PM-10 attainment plans and associated rules and regulations remain in place to maintain this level of air quality. New and expanded regulations proposed to combat "Extreme" ozone pollution and PM-2.5 (discussed below) would be expected to provide even more improvement in PM-10 pollution situation.

The 2025 Fresno General Plan provided policy direction in support of "indirect source review" as a method for controlling mobile source pollution. Although vehicle engines and fuels are outside the purview of local and regional jurisdictions in California, approaching mobile source pollution indirectly, through regulation and mitigation of land uses which generate traffic, is an alternative approach.

In March of 2006, the San Joaquin Valley Air Pollution Control District adopted Rule 9510, its Indirect Source Review Rule. Full implementation of this Rule has been delayed due to litigation (mitigation fees are being collected and retained in holding accounts), but projects are already being evaluated under Rule 9510 and are implementing many aspects of the Rule, such as clean air design (pedestrian and bike facilities; proximal siting of residential and commercial land uses; low-pollution construction equipment; dust control measures; cleaner-burning combustion appliances, etc.).

It is anticipated that full implementation (release of mitigation impact fees for various clean air projects throughout the San Joaquin Valley) and subsequent augmentation of the Indirect Source Review Rule will accelerate progress toward attainment of federal and state ozone standards, and will be an important component of the attainment plan for PM-2.5 (very fine particulate matter) and for greenhouse gas reductions to combat global climate change.

PM-2.5 is a newly-designated category of air pollutant, the component of PM-10 comprised of particles 2.5 microns in diameter or smaller. The 1997 Clean Air Act Amendments directed that this pollutant be brought under regulatory control, but federal and state standards/designations had not been finalized when the 2025 Fresno General Plan MEIR was drafted and certified. In the intervening time, the San Joaquin Valley Air Basin has been classified as being in "Nonattainment" for the 1997 federal PM-2.5 standard and for the State PM-2.5 standard.

An attainment demonstration plan for the federal 1997 PM-2.5 standard has been adopted by the SJVAPCD and approved by the California Air Resources Board, and forwarded to the EPA for approval (status as of mid-2008). The attainment plan would achieve compliance with the 1997 federal Clean Air Act PM-2.5 standard by year 2014, in conjunction with California Air Resources Board (and US EPA) action to improve diesel engine emissions. The San Joaquin Valley Air Basin has not yet been classified under the more stringent revised federal 2006 PM-2.5 standard; this classification is expected by 2009.

As with ozone and PM-10 pollution, levels of PM-2.5 have already been reduced by already-existing air quality improvement planning policies, mitigation measures, and regulations. The following charts depict historic PM-2.5 monitoring data for the regional air basin. Once the expected SJVAPCD attainment plan is implemented measures specific to PM-2.5 control, the rate of progress toward attainment of federal and state PM-2.5 standards will accelerate.

When the 2025 Fresno General Plan and its MEIR were approved in late 2002, the planning and environmental documents did not directly or separately analyze potential global warming and climate change impacts. However, the general policy direction for consideration of air quality parameters in development project evaluations and for reducing those air pollutants which are already under regulation would operate to control these potential adverse impacts.

"Global warming" is the term coined to describe a widespread climate change characterized by a rising trend in the Earth's ambient average temperatures with concomitant disturbances in weather patterns and resulting alteration of oceanic and terrestrial environs and biota. When sunlight strikes the Earth's surface, some of it is reflected back into space as infrared radiation. When the net amount of solar energy reaching Earth's surface is about the same as the amount of energy radiated back into space, the average ambient temperature of the Earth's surface would remain more or less constant. Greenhouse gases potentially disturb this equilibrium by absorbing and retaining infrared energy, trapping heat in the atmosphere—the "greenhouse gas effect."

The predominant current opinion within the scientific community is that global warming is occurring, and that it is being caused and/or accelerated via generation of excess "greenhouse gases" [GHGs], that natural carbon cycle processes (such as photosynthesis) are unable to absorb sufficient quantities of GHG and cannot keep the level of these gases or their warming effect under control. It is believed that a combination of factors related to human activities, such as deforestation and an increased emission of GHG into the atmosphere from combustion and chemical emissions, is a primary cause of global climate change.

The predominant types of anthropogenic greenhouse gases (those caused by human activity), are described as follows. It should be noted that the starred GHGs are regulated by existing air quality policies and rules pursuant to their roles in ozone and particulate matter formation and/or as potential toxic air contaminants.

- carbon dioxide ( $\text{CO}_2$ ), largely generated by combustion activities such as coal and wood burning and fossil fuel use in vehicles but also a byproduct of respiration and volcanic activity;
- \*methane ( $\text{CH}_4$ ), known commonly as "natural gas," is present in geologic deposits and is also evolved by anaerobic decay processes and animal digestion. On a ton-for-ton basis,  $\text{CH}_4$  exerts about 20 times the greenhouse gas effect of  $\text{CO}_2$ ;
- \*nitrous oxide ( $\text{N}_2\text{O}$ ), produced in large part by soil microbes and enhanced through application of fertilizers.  $\text{N}_2\text{O}$  is also a byproduct of fossil fuel burning; atmospheric nitrogen, an inert gas that makes up a large proportion of the atmosphere, is oxidized when air is exposed to high-temperature combustion.  $\text{N}_2\text{O}$  is used in some industrial processes, as a fuel for rocket and racing engines, as a propellant, and as an anesthetic.  $\text{N}_2\text{O}$  is one component of "oxides of nitrogen" (NOX), long recognized as precursors of smog-causing atmospheric oxidants.
- \*chlorofluorocarbons (CFCs), synthetic chemicals developed in the late 1920s for use as improved refrigerants (e.g., "Freon<sup>TM</sup>"). It was recognized over two decades ago that this class of chemicals exerted powerful and persistent greenhouse gas effects. In 1987, the Montreal Protocol halted production of CFCs.

- \*hydrofluorocarbons (HFCs), another class of synthetic refrigerants developed to replace CFCs;
- \*perfluorocarbons (PFCs), used in aluminum and semiconductor manufacturing, have an extremely stable molecular structure, with biological half-lives tens of thousands of years, leading to ongoing atmospheric accumulation of these GHGs.
- \*sulfur hexafluoride (SF<sub>6</sub>) is used for insulation in electric equipment, semiconductor manufacturing, magnesium refining and as a tracer gas for leak detection. Of any gas evaluated, SF<sub>6</sub> exerts the most powerful greenhouse gas effect, almost 24,000 times as powerful as that of CO<sub>2</sub> on a ton-for-ton basis.
- water vapor, the most predominant GHG, and a natural occurrence: approximately 85% of the water vapor in the atmosphere is created by evaporation from the oceans.

In an effort to address the perceived causes of global warming by reducing the amount of anthropogenic greenhouse gases generated in California, the state enacted the Global Warming Solutions Act of 2006 (Codified as Health & Safety Code Section 38501 *et seq.*). Key provisions include the following:

- Δ Codification of the state's goal by requiring that California's GHG emissions be reduced to 1990 "baseline" levels by 2020.
- Δ Set deadlines for establishing an enforcement mechanism to reduce GHG emissions:
  - By June 30, 2007, the California Air Resources Board ("CARB") was required to publish "discrete early action" GHG emission reduction measures. Discrete early actions are regulations to reduce greenhouse gas emissions to be adopted by the CARB and enforceable by January 1, 2010;
  - By January 1, 2008, CARB was required to identify what the state's GHG emissions were in 1990 (set the "baseline") and approve a statewide emissions limit for the year 2020 that is equivalent to 1990 levels. (These statewide baseline emissions have not yet been allocated to regions, counties, or smaller political jurisdictions.) By this same date, CARB was required to adopt regulations to require the reporting and verification of statewide greenhouse gas emissions.
  - By January 1, 2011, CARB must adopt emission limits and emission reduction measures to take effect by January 1, 2012.

As support for this legislation, the Act contains factual statements regarding the potential significant impacts on California's physical environment that could be caused by global warming. These include, an increase in the intensity and duration of heat waves, the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snow pack, a rise in sea levels resulting in the displacement of thousands of coastal businesses and residences, damage to marine ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems.

On August 24, 2007, California also enacted legislation (Public Resources Code §§ 21083.05 and 21097) requiring the state Resources Agency to adopt guidelines for addressing climate change in environmental analysis pursuant to the California Environmental Quality Act. By July 1, 2009, the Governor's Office of Planning and Research (OPR) is required to prepare

guidelines for the mitigation of greenhouse gas emissions, and transmit those draft regulations to the Resources Agency. The Resources Agency must then certify and adopt the guidelines by January 1, 2010.

The recently-released update of the Urbemis computer model (used by the City of Fresno Planning and Development Department for environmental assessments, pursuant to a specific MEIR mitigation measure) does provide data on the amounts of CO<sub>2</sub> and oxides of nitrogen (NOX) potentially generated by development projects. However, at this point in time, neither CARB nor the SJVAPCD has determined what the 1997 baseline or current "inventory" of GHGs is for the entire state nor for any region or jurisdiction within the state. No agency has adopted GHG emission limits and emission reduction measures, and because CEQA guidelines have not been established for the evaluation and mitigation of greenhouse gas emissions (there is an absence of regulatory guidance). Therefore, the City is unable to productively interpret the results of the Urbemis model with regard to GHGs, and there is currently no way to determine the significance of a project's potential impact upon global warming.

The 2025 Fresno General Plan provides an integrated combination of residential, commercial, industrial, and public facility uses allowing for proximate location of living, work, educational, recreational, and shopping activities within Fresno metropolitan area. This combination of uses has been identified as a potential mitigation measure to address global warming impacts in a document published by the California Attorney General's Office entitled, *The California Environmental Quality Act Mitigation of Global Warming Impacts* (updated January 7, 2008). Specifically, this document describes this mitigation measure as follows, "Incorporate mixed-use, infill and higher density development to reduce vehicle trips, promote alternatives to individual vehicle travel, and promote efficient delivery of services and goods"—echoing objectives and policies of the 2025 Fresno General Plan adopted in late 2002.

The General Plan contains a mix of land uses would be expected to generate fewer vehicle miles traveled per capita, leading to reduced emissions of greenhouse gases from engine emissions. It provides for overall denser development with high-intensity enclaves, associated with increased public transit use. The plan fosters mixed use and infill development (being implemented by mixed-use zoning ordinances added to the Fresno Municipal Code, as directed by 2025 Fresno General Plan) policies. The urban form element distributes neighborhood-level and larger commercial development, public facilities such as schools, and recreational sites throughout the metropolitan area, reducing vehicle trips.

Any manufacturing activities that would generate SF<sub>6</sub>, HFCs, or PFCs would be subject to subsequent environmental review at the project-specific level, as would any uses which would generate methane on site. The City of Fresno has adopted an ordinance prohibiting installation of any woodburning fireplaces or woodburning appliances in new homes, which would reduce CO<sub>2</sub> and N<sub>2</sub>O from wood combustion.

Through updates in the California Building Code and statewide regulation of appliance standards, City development projects conform to state-of-the art energy-efficient building, lighting, and appliance standards as advocated in the California Environmental Protection Agency's publication *Climate Action Team / Proposed Early Actions to Mitigate Climate Change in California* (April 2007) and in CARB's *Proposed Early Actions to Mitigate Climate Change in California* (April 2007). The City has further incentivized "green" building projects by providing subsidies for solar photovoltaic equipment for single-family residential construction, by reducing development standards (including reductions in required parking spaces, which further reduces

air pollutant and GHG emissions), and by improving its landscape and shading standards (a topic included in the Design Guidelines adopted with the 2025 Fresno General Plan).

Updated engine and tire efficiency standards would apply to residents' vehicles, as well as the statewide initiatives applicable to air conditioning and refrigeration equipment, regional transportation improvements, power generation and use of solar energy, water supply and water conservation, landfill methane capture, changes in cement manufacturing processes, manure management (methane digester protocols), recycling program enhancements, and "carbon capture" (also known as "carbon sequestration," technologies for capturing and converting CO<sub>2</sub>, removing it from the atmosphere).

Due to the lack of data or regulatory guidance that would indicate the 2025 Fresno General Plan had a significant adverse impact upon global climate change, the relatively small size of the Fresno Metropolitan Area in conjunction with the worldwide scope of GHG emissions, and the emphasis in the 2025 Fresno General Plan upon integrated urban design and air pollution control measures, it could not be concluded in 2002 nor at present that the 2025 Fresno General Plan would have a significant adverse impact on global climate change.

As to potential impacts of global warming upon the 2025 Fresno General Plan: the city is located in the Central Valley, in an urbanized area on flat terrain distant from the Pacific coast and from rivers and streams. It is outside of identified flood prone areas. Based on its location we conclude that Fresno is not likely to be significantly affected by the potential impacts of global climate change such as increased sea level and river/stream channel flooding; nor is it subject to wildfire hazards. While Fresno does contain areas with natural habitat (the San Joaquin Bluffs and Riverbottom), a change in these areas' biota induced by global warming would not leave them bereft of all habitat value—it would simply mean a change in the species which would be encountered in these areas. The 2025 Fresno General Plan preserves this habitat open space area for multiple objectives (protection from soil instability and flood inundation; conservation of designated high-quality mineral resources), so any natural resource species changes in those areas would not constitute a significant adverse impact to the city or a loss of resource area.

Fresno has historically had high ambient summer temperatures and an historic heat mortality level that is among the highest in the state (5 heat-related deaths annually per 100,000 population). Due to the prevalence of air conditioning in dwellings and commercial buildings, an increase in extreme heat days from global warming is not expected by the California Air Resources Board Research Division to significantly increase heat-related deaths in Fresno, as opposed to possible effects in cooler portions of the state such as Sacramento or Los Angeles areas (reference: *Projections of Public Health Impacts of Climate Change in California: Scenario Analysis*, by Dr. Deborah Dreschler, Air Resources Board, April 9, 2008). Increased summertime temperatures which may be caused by global warming will be mitigated by the City's landscaping standards to provide shade trees, by statewide energy efficiency standards which insulate dwellings from heat and cold, and by urban design standards which require east-west orientation of streets and buildings to facilitate solar gain. Fresno has a heat emergency response plan and provides cooling centers and free transportation to persons who do not have access to air conditioning.

Secondary health effects of global warming could include increases in respiratory and cardiac illnesses attributable to poor air quality. The San Joaquin Valley Air Pollution Control District provides daily advisories and warnings in times of high ozone levels to help senior citizens and

other sensitive populations avoid exposure. The SJVAPCD has committed to attainment of fine particulate matter (PM<sub>2.5</sub>) standards by Year 2014 and to attainment of oxidant/ozone standards by Year 2023, and would adopt additional Rules and emission controls as necessary to decrease emissions inventories by those target dates. There is insufficient information to indicate that global climate change would prevent attainment of air quality parameters affecting health.

Pursuant to 2025 Fresno General Plan policy and MEIR mitigation measures, the City's Department of Public Utilities and Fire Department are required to affirm that adequate water service can be provided to all development projects for potable and fire suppression uses. The City derives much of its water supply from groundwater, using its surface water entitlements from the Kings and San Joaquin Rivers primarily to recharge the aquifer. A high percentage of Fresno's annual precipitation is captured and percolated in ponding basins operated by Fresno Metropolitan Flood Control District. If global climate change leads to a longer rainy season and/or more storm events throughout the year, groundwater supplies could be improved by additional percolation.

The City of Fresno currently treats and distributes only some 20% of its 150,000 acre-foot/year (AFY) surface water entitlement for the municipal water system, directing another 50,000 to 70,000 AFY to recharge activities via ponding basins. Presently, the City is unable to recharge the full balance of its annual entitlement in average and wet years, and releases any unused surface water supplies to area irrigation districts for agricultural use in the metropolitan area, (which further augments groundwater recharge through percolation of irrigated water).

Future surface water plant construction projects envisioned by the 2025 Fresno General Plan would account for less than 120,000 acre-feet per year of the surface supply. The General Plan direction for future Metropolitan Water Resource Management Plans includes exploring the use of recycled treated wastewater for non-potable uses such as landscape irrigation, which would further effectively extending the City's water supply.

If the global climate change were to cause a serious and persistent decrease in Sierra snowpack, some of Fresno's water supply could be affected. However, historic records show that the very long-term prevailing climatic pattern for Central California has included droughts of long (often, multi-year) duration, interspersed with years of excess precipitation. Decades before global climate change was considered as a threat to California's water system, state and local agencies recognized a need to augment water storage capacity for excess precipitation occurring in wet years, to carry the state through the intervening dry years.

The potential for episodic and long-term drought is considered in the city's Metropolitan Water Resource Plan and in its the Urban Water Management Plan Drought Contingency component, to accommodate reductions in available water supplies. In times of extended severe regional or statewide drought, a reprioritization of water deliveries and reallocation for critical urban supplies vs. agricultural use is possible, but it is too speculative at this time to determine what the statewide reprioritization response elements would be (the various responses of statewide and regional water agencies to these situations are not fully formulated and cannot be predicted with certainty). Because the true long term consequences of climate change on California's and Fresno's water system cannot be predicted, and, it is too speculative at this time to conclude that there could be a significant adverse impact on water supply for the 2025 Fresno General Plan due to global climate change.

As noted above, it is theorized that global warming could lead to more energy in the atmosphere and to increased intensity or frequency of storm events. Fresno's long-term weather pattern is that rainfall occurs during episodic and fairly high-intensity events. The Fresno Metropolitan Flood Control District (FMFCD) drainage and flood control Master Plan, which sets policies for drainage infrastructure and grading in the entire Fresno-Clovis area, is already predicated on this type of weather pattern. FMFCD sizes its facilities (which development potentiated by the 2025 Fresno General Plan will help to complete) for "two-year storm events," storms of an intensity expected in approximately 50 percent of average years; however, the urban drainage system design has additional capacity built into the street system so that excess runoff from more intense precipitation events is directed to the street system. The City's Flood Plan Ordinance and grading standards require that finished floor heights be above the crowns of streets and above any elevated ditchbanks of irrigation canals. FMFCD project conditions also preserve "breakover" historic surface drainage routes for runoff from major storms. Ultimately, drain inlets and FMFCD basin dewatering pumps direct severe storm runoff into the network of Fresno Irrigation District canals and pipelines still extant in the metropolitan area, with outfalls beyond the western edge of the metropolitan area.

Scientific information, analytical tools, and standards for environmental significance of global warming and green house gases were not available to the Planning and Development Department in 2002 when the 2025 Fresno General Plan and its MEIR were formulated and approved--and at this point, there is still insufficient data available to draw any conclusions as to the potential impacts, or significance of impacts, related to global climate change for the 2025 Fresno General Plan. Similarly, there is insufficient information to conclude that global warming may have a potentially significant adverse impact upon the 2025 Fresno General Plan. In a situation when it would be highly speculative to estimate impacts or to make conclusions as to the degree of adversity and significance of those impacts, the California Environmental Quality Act allows agencies to terminate the analysis. In that regard, there is no material change in status from the degree of environmental review on this topic contained in the 2025 Fresno General Plan MEIR.

Planning Commission Resolution Nos. 13270 (EA &  
Rezone) and 13271 (Variance)

**This page intentionally left blank.**

**FRESNO CITY PLANNING COMMISSION  
RESOLUTION NO. 13270**

The Fresno City Planning Commission, at its regular meeting on February 19, 2014, adopted the following resolution relating to Rezone Application No. R-14-001.

WHEREAS, Rezone Application No. R-14-001 has been filed with the City of Fresno to rezone the subject property as described below:

REQUESTED ZONING: M-1/cz (*Light Manufacturing/conditions of zoning*) zone district

EXISTING ZONING: C-M (*Commercial and Light Manufacturing*) zone district

APPLICANT: Michael Henebury, Bulldog Recycling

LOCATION: East side of North Clark Street between East Floradora and East McKinley Avenues; 1454 North Clark Street

APN: 451-151-13

DESCRIPTION  
OF PROPERTY

TO BE REZONED: From: C-M (*Commercial and Light Manufacturing*) zone district to the M-1 (*Light Manufacturing*) zone district.

As described and depicted on the attached Exhibit "A".

APN: 451-151-13

WHEREAS, the above-named applicant is requesting a zoning change on the above property from the from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1 (*Light Manufacturing*) zone district and will maintain consistency with the 2025 Fresno General Plan and Fresno High-Roeding Community Plan (subject to the review and approval of the related conditional use permit request); and,

WHEREAS, the Fresno City Planning Commission on February 19, 2014, reviewed the subject rezone application in accordance with the policies of the 2025 Fresno General Plan and the Fresno High-Roeding Community Plan; and,

WHEREAS, during the February 19, 2014, hearing, the Commission received a staff report and related information, environmental documents and considered testimony regarding the requested zoning change.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Fresno, based upon the testimony and information presented at the hearing and upon review and consideration of the environmental documentation provided, as follows:

1. The Commission finds in accordance with its own independent judgment, that there is no substantial evidence in the record that, with mitigation measures imposed, Rezone Application No. R-14-001 may have additional significant effects on the environment that were not identified in the 2025 Fresno General Plan Master Environmental Impact Report No. 10130 ("MEIR") or Mitigated Negative Declaration No. A-09-02 (Air Quality MND); and, that no new or additional mitigation measures or alternatives may be required. In addition, pursuant to Public Resources Code, Section 21157.6(b)(1), the Commission finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and that no new information, which was not known and could not have been known at the time that the MEIR or Air Quality MND were certified as complete, has become available. Accordingly, the Commission recommends Council adopt the Finding of Conformity prepared for Environmental Assessment No. R-14-001/V-14-001.

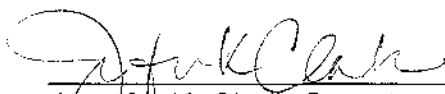

BE IT FURTHER RESOLVED that the Fresno City Planning Commission hereby recommends to the City Council that the requested M-1/cz (*Light Manufacturing/conditions of zoning*) zone district for the subject property be approved subject to the condition of zoning listed below:

1. Any Conditional Use Permit proposed on the subject site must be reviewed and approved by the Planning Commission

The foregoing Resolution was adopted by the Fresno City Planning Commission, upon a motion by Commissioner Hansen-Smith, seconded by Holt.

VOTING:           Ayes - Medina, Hansen-Smith, Reed, Vasquez, Holt, and Torossian  
                      Noes - None  
                      Not Voting - None  
                      Absent - None

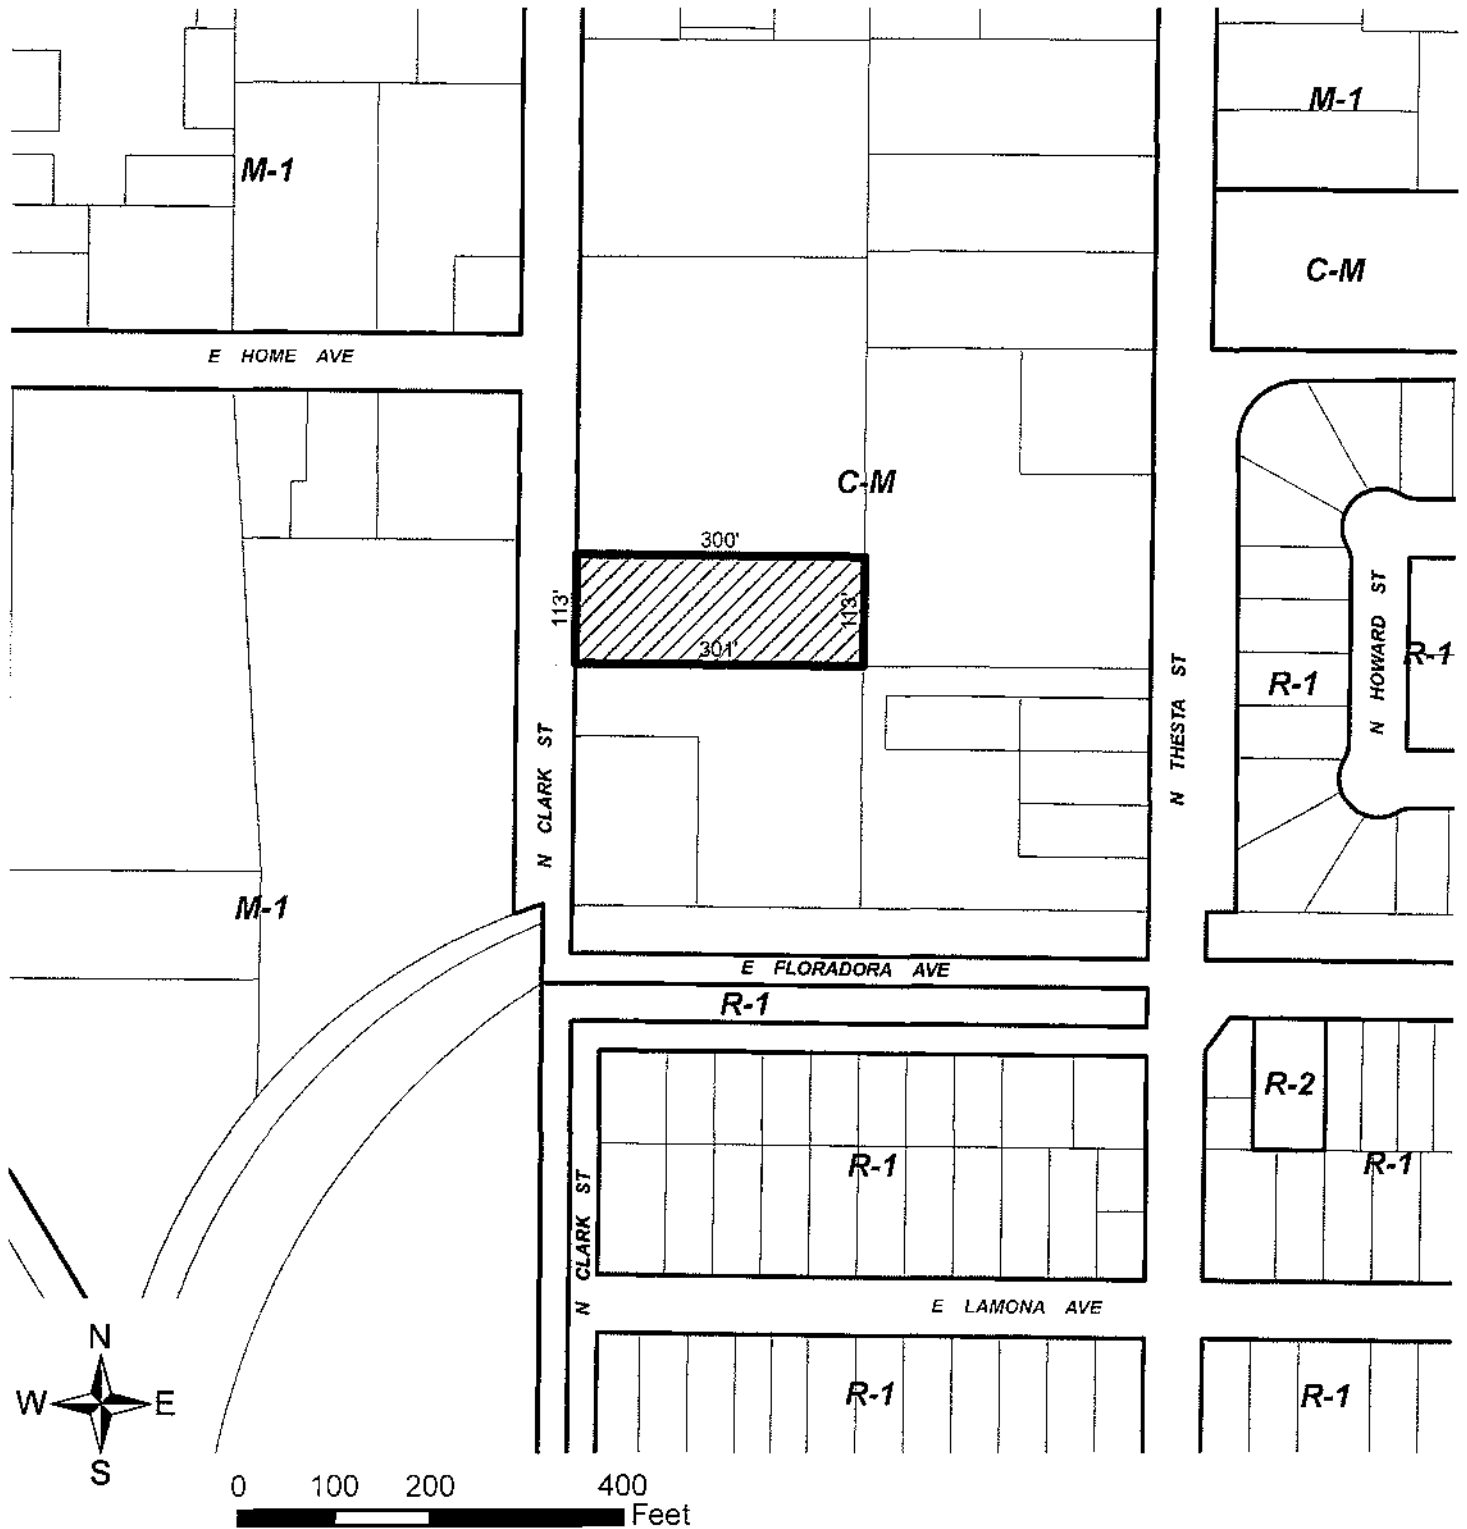

DATED: February 19, 2014

Jennifer K. Clark, Secretary  
Fresno City Planning Commission

Resolution No. 13270  
Rezone Application No. R-14-001  
Filed by Michael Henebury  
Action: Recommend Approval

# EXHIBIT A

R-14-001  
APN: 451-151-13  
1454 North Clark Street

 C-M to M-1, 33,992 Square Feet

**This page intentionally left blank.**

**FRESNO CITY PLANNING COMMISSION  
RESOLUTION NO. 13271**

The Fresno City Planning Commission at its regular meeting on February 19, 2014, adopted the following resolution pursuant to Section 12-406-F of the Fresno Municipal Code.

WHEREAS, Variance Application No. V-14-001, filed by Michael Henebury of bulldog Recycling, pertaining to approximately .79 acres of property located on the east side of North Clark Street between East Floradora and East McKinley Avenues (1454 North Clark Street). This application requests a reduction in the minimum one-acre lot size for a recycling center that is required pursuant to Director Classification No. 161; and,

WHEREAS, the Fresno City Planning Commission conducted a duly noticed public hearing on February 19, 2014; and,

WHEREAS, several members of the public spoke in support and opposition of the variance request; and,

WHEREAS, the Development and Resource Management Department staff prepared a report and recommended approval of Variance Application No. V-14-001 because the 5 findings required Pursuant to Section 12-405-A-1 of the Fresno Municipal Code could be made.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Fresno, based upon the testimony and information presented at the hearing and upon review and consideration of the environmental documentation provided, as follows:

1. The Commission finds in accordance with its own independent judgment, that there is no substantial evidence in the record that, with mitigation measures imposed, Rezone Application No. R-14-001 may have additional significant effects on the environment that were not identified in the 2025 Fresno General Plan Master Environmental Impact Report No. 10130 ("MEIR") or Mitigated Negative Declaration No. A-09-02 (Air Quality MND); and, that no new or additional mitigation measures or alternatives may be required. In addition, pursuant to Public Resources Code, Section 21157.6(b)(1), the Commission finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and that no new information, which was not known and could not have been known at the time that the MEIR or Air Quality MND were certified as complete, has become available. Accordingly, the Commission recommends Council adopt the Finding of Conformity prepared for Environmental Assessment No. R-14-001/V-14-001.

BE IT FURTHER RESOLVED that the Fresno City Planning Commission finds that the approval of Variance Application No. V-14-001 is consistent with the adopted 2025 Fresno General Plan and the Fresno High-Roeding Community Plan.

BE IT FURTHER RESOLVED that, after receiving the staff report and testimony, the Fresno City Planning Commission has determined that the findings necessary to grant the variance application have been met in accordance with Section 12-405-A-1 of the Fresno Municipal Code, as noted below, and hereby approves Variance Application No. V-14-001.

<b>FINDINGS PER FRESNO MUNICIPAL CODE SECTION 12-405-A-2.</b>	
<p>a. Because of special circumstances (other than monetary hardship) applicable to the property, including its size, shape, topography, location, or surroundings, the strict application of the Zoning Ordinance deprives such property of privileges (not including the privilege of maintaining a nonconforming use or status) enjoyed by other property in the vicinity and in an identical zoning district; and,</p>	
<i>Finding a:</i>	<p>The one acre minimum was established under Director's Classification 161 to prevent extremely small sites from being developed with a use that potentially requires outdoor area for baling, storing, etc. The subject site is not a true "Light Processor" that is permitted under Director's Classification 161 because the site does not process materials and thus does not need as much room. In addition, all storage of materials will be conducted inside of the building. Thus, because of these special circumstances related to the operation of the facility, the strict application of the zoning ordinance would deprive the property of privileges enjoyed by other property in the vicinity in an identical zoning district.</p>
<p>b. The grant of variance will not constitute a special privilege inconsistent with the limitations upon other properties in the vicinity and zoning district in which the property is situated; and,</p>	
<i>Finding b:</i>	<p>The granting of the variance will not constitute a special privilege inconsistent with the limitations upon other properties in the vicinity and zoning district in which the property is situated because many of the properties in the area are over 1 acre in size and would be allowed to have a recycling facility. This specific business is also impacted by high-speed rail, unlike other businesses in the area.</p>
<p>c. The grant of variance will not be detrimental to the public welfare or injurious to property or improvements in the area in which the property is located; and</p>	
<i>Finding c:</i>	<p>The staff of the Development and Resource Management Department has determined that the proposed project will not be detrimental to the public welfare or be injurious to property or improvements in the area in which the property is located if developed in accordance with the various conditions/requirements that will be established during the conditional use permit application review process. For example, conditions of Director's Class No. 161 will be incorporated.</p>
<p>d. The grant of variance will not be in conflict with established general and specific plans and policies of the city; and</p>	
<i>Finding d:</i>	<p>The staff of the Development and Resource Management Department has determined that the proposed project will not be in conflict with established general and specific plans and policies of the city. If approved, the proposed project would</p>

	be consistent with both zoning and planned land use designations where recycling facilities are a permitted use, subject to a conditional use permit and approved variance. Both the 2025 Fresno General Plan and the Fresno High/Roeding Community designate this property as a "light" industrial use which is less intensive than other uses in the area zoned M-2 (General Industrial) and M-3 (Heavy Industrial) and discussed within this staff report.
e. The grant of a variance from existing development standards will encourage infill development within designated inner city areas as defined by 12-105-I.	
<i>Finding e:</i>	<p>The grant of a variance from existing development standards will encourage infill development within designated inner city areas as defined by 12-105-I. The Blackstone-McKinley Avenue area, located in the center of the City's urbanized area, is too small to provide for the expansion of industrial activity of any type other than highly specialized service orientation.</p> <p>The proposed use, on a site just under one (1) acre would counter industrial decline in the immediate project area where large scale industrial development or use is limited.</p>

The foregoing Resolution was adopted by the Fresno City Planning Commission upon a motion by Commissioner Hansen-Smith, seconded by Chair Holt.

BILL NO. \_\_\_\_\_

ORDINANCE NO. \_\_\_\_\_

AN ORDINANCE OF THE CITY OF FRESNO, CALIFORNIA,  
AMENDING THE OFFICIAL ZONE MAP OF THE CITY OF  
FRESNO HERETOFORE ADOPTED BY ARTICLES 1 TO 4.5  
INCLUSIVE, CHAPTER 12, OF THE FRESNO MUNICIPAL CODE,  
BEING THE ZONING ORDINANCE OF THE CITY OF FRESNO

WHEREAS, Rezone Application No. R-14-001 has been filed by Michael Henebury of  
Bulldog Recycling, with the City of Fresno to rezone property as described herein below; and,

WHEREAS, pursuant to the provisions of Article 4, Chapter 12, of the Fresno Municipal  
Code, the Planning Commission of the City of Fresno held a public hearing on the 19<sup>th</sup> day of  
February, 2014, to consider Rezone Application No. R-14-001 and related Environmental  
Assessment No. R-14-001/V-14-001, during which the Commission considered the  
environmental assessment and recommended to the Council of the City of Fresno approval,  
as evidenced in Planning Commission Resolution No. 13270 of the rezone application to  
amend the Official Zone Map to reclassify the subject property from the C-M (*Commercial  
and Light Manufacturing*) zone district to the M-1/CZ (*Light Manufacturing/Conditions of  
Zoning*) zone district; and,

WHEREAS, the Council of the City of Fresno, on the 3<sup>rd</sup> day of April, 2014, received  
the recommendation of the Planning Commission.

NOW, THEREFORE, THE COUNCIL OF THE CITY OF FRESNO DOES ORDAIN AS  
FOLLOWS:

SECTION 1. The Council finds in accordance with its own independent judgment,  
that there is no substantial evidence in the record that, with mitigation measures imposed,  
Rezone Application No. R-14-001 may have additional significant effects on the environment  
that were not identified in the 2025 Fresno General Plan Master Environmental Impact

Report No. 10130 ("MEIR") or Mitigated Negative Declaration No. A-09-02 (Air Quality MND); and, that no new or additional mitigation measures or alternatives may be required. In addition, pursuant to Public Resources Code, Section 21157.6(b)(1), the Council finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and that no new information, which was not known and could not have been known at the time that the MEIR or Air Quality MND were certified as complete, has become available.

SECTION 2. The Council finds the requested M-1/CZ (*Light Manufacturing/Conditions of Zoning*) zone district is consistent with the Light Manufacturing planned land use designation of the 2025 Fresno General Plan and the Fresno High-Roeding Community Plan as specified in Section 12-403-B of the Fresno Municipal Code, respectively.

SECTION 3. The Council finds that the zone district of the real property described hereinbelow, located in the City of Fresno and shown on the Official Zone Map of the City of Fresno, is reclassified from the C-M (*Commercial and Light Manufacturing*) zone district to the M-1/CZ (*Light Manufacturing/Conditions of Zoning*) zone district, as depicted in the attached Exhibit "A" and subject to the condition of zoning listed below:

1. Any Conditional Use Permit proposed on the subject site must be reviewed and approved by the Planning Commission.

SECTION 4. This ordinance shall become effective and in full force and effect at 12:01 a.m. on the thirty-first day after its passage.
